

SENSATA SENSORS AND SWITCHES FOR AIR CONDITIONING AND REFRIGERATION

OUR DEVICES ENABLE MORE EFFICIENT, COMPLIANT, CONNECTED SYSTEMS.

In the increasingly demanding world of HVAC systems, high efficiency, compliance and connectivity is a must. To meet these demands, more and technologically advanced sensors are needed. That's what Sensata delivers. Our application experts work with engineers one-on-one, every day, to help you increase energy efficiency and system reliability, achieve regulatory compliance, incorporate environmentally-friendly refrigerants and satisfy your appetite for new features and greater connectivity.

When you collaborate with Sensata, you gain our 30 years of experience as a leader in commercial HVAC systems. And with engineering and support specialists deployed around the world, you can count on Sensata to be there for you, when and where you need us.

APPLICATION OVERVIEW

Variable Refrigerant Flow Systems (VRF)

Light Commercial Air Conditioning

Bus/Train Air Conditioning

Residential Air Conditioning

Rooftops and Chillers

Control Units

Beverage Dispensing & Cooling

Supermarket Refrigeration (Showcase, Vertical Display cases, etc.)

Transport Refrigeration (Reefer Trucks, Cooled Cargo Containers, etc)

PRODUCT OVERVIEW

Pressure switches:

20PS & PS80 - automatic reset

25PS - automatic reset

29PS - manual reset

Pressure sensors:

116CP/117CP - ceramic capacitive 0 – 16 bar range

2CP5 & 35CP - ceramic capacitive 0 – 60 bar range

81/82CP - tif tube port 0 – 60 bar range

2HMP - oil filled mems, hermetic 0 – 70 bar range

112CP - integrated P+T 0 – 60 bar range

PTE7000 - hermetic 0 – 600 bar range

P99x - silicon capacitive 0 – 25 mBar range

Thermostats:

1NT and 3NT

For the PS80, 25 PS, 2CP5 & 81/82CP, and 3NT: ATEX compliant options are available.

Motor Protectors:

HM Motor Protector series

Phenolic Motor Protector series (3/4")

Sensata solutions for Air Conditioning and Refrigeration provide:

- Precise refrigerant pressure measurement and control
- Pressure sensing for efficient variable speed control & VRF systems
- Robust sensors and switches suitable for mobile refrigeration applications
- Integrated pressure and temperature sensors for reduced components
- Hermetic options for demanding HVAC environments
- Solutions available suitable for a variety of natural refrigerants (CO₂, ammonia, hydrocarbons)
- Long term reliability

Features and benefits of Sensata's products :

- Suitable for CO₂, ammonia, R290, R1234YF, R32, etc.
- Industry leading accuracy over wide operating ranges
- Fully stainless steel options available
- Broad operating temp. range (-40°C to +135°C)
- Hermetic and case isolated options available
- Outstanding EMC/ESD performance
- Overvoltage and reverse polarity protection
- ATEX certified pressure switches and sensors
- Pressure ranges of 0 – 70 bar, 0 – 600 bar, 0 – 25mBar
- Flexibility with ports, connectors and mounting options

Sensata Technologies is one of the world's leading suppliers of sensing, electrical protection, control and power management solutions with operations and business centers in twelve countries. Sensata's products improve safety, efficiency and comfort for millions of people every day in automotive, appliance, aircraft, industrial, military, heavy vehicle, heating, air-conditioning and ventilation, data, telecommunications, recreational vehicle and marine applications.
