My Leviton App Guide

DECORA SMART WI-FI
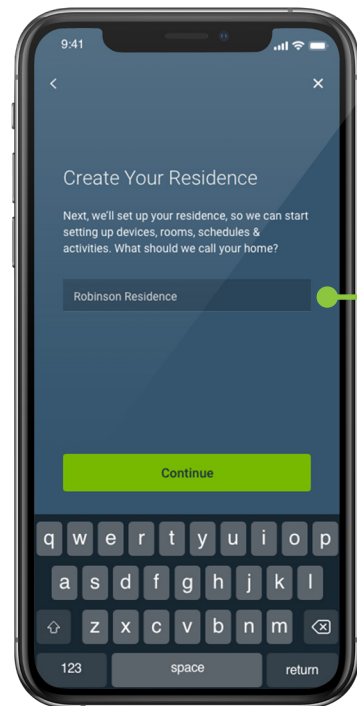

Watch the Intro Video Here

Create a My Leviton Residence

Download the My Leviton App to your iOS or Android device and create your account to begin the set up of your smart home.
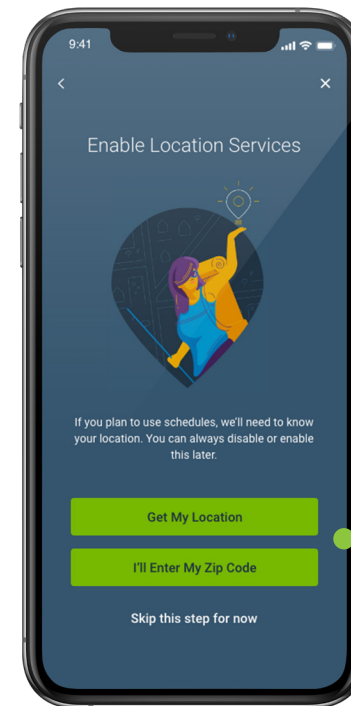

Name your residence

1

Enter name of the residence

Enable location or enter your zip code

2

The location is required to set schedules based on sunrise and sunset

Adding a Decora Smart Device

Add your Decora Smart device by selecting from the menu or scanning the product barcode on the package. Repeat and continue this process until all installed Decora Smart Wi-Fi products have been set up. For video guidance check out the Decora Smart app setup video.
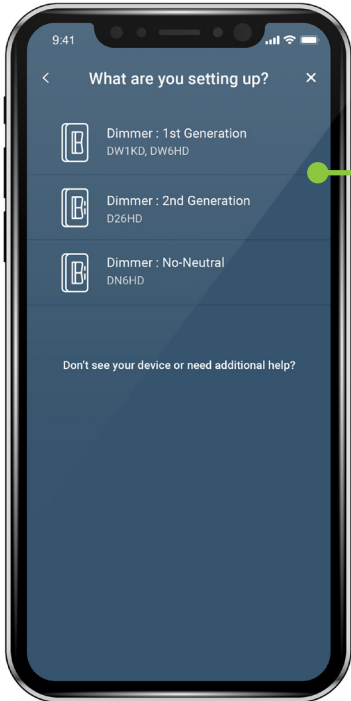

Add device and follow prompts in App

1
On the Dashboard screen, press the Plus (+) button. Then, choose the type of device you are setting up from the menu

2a

In some instances, there may be more than one type of device. Choose which you are using
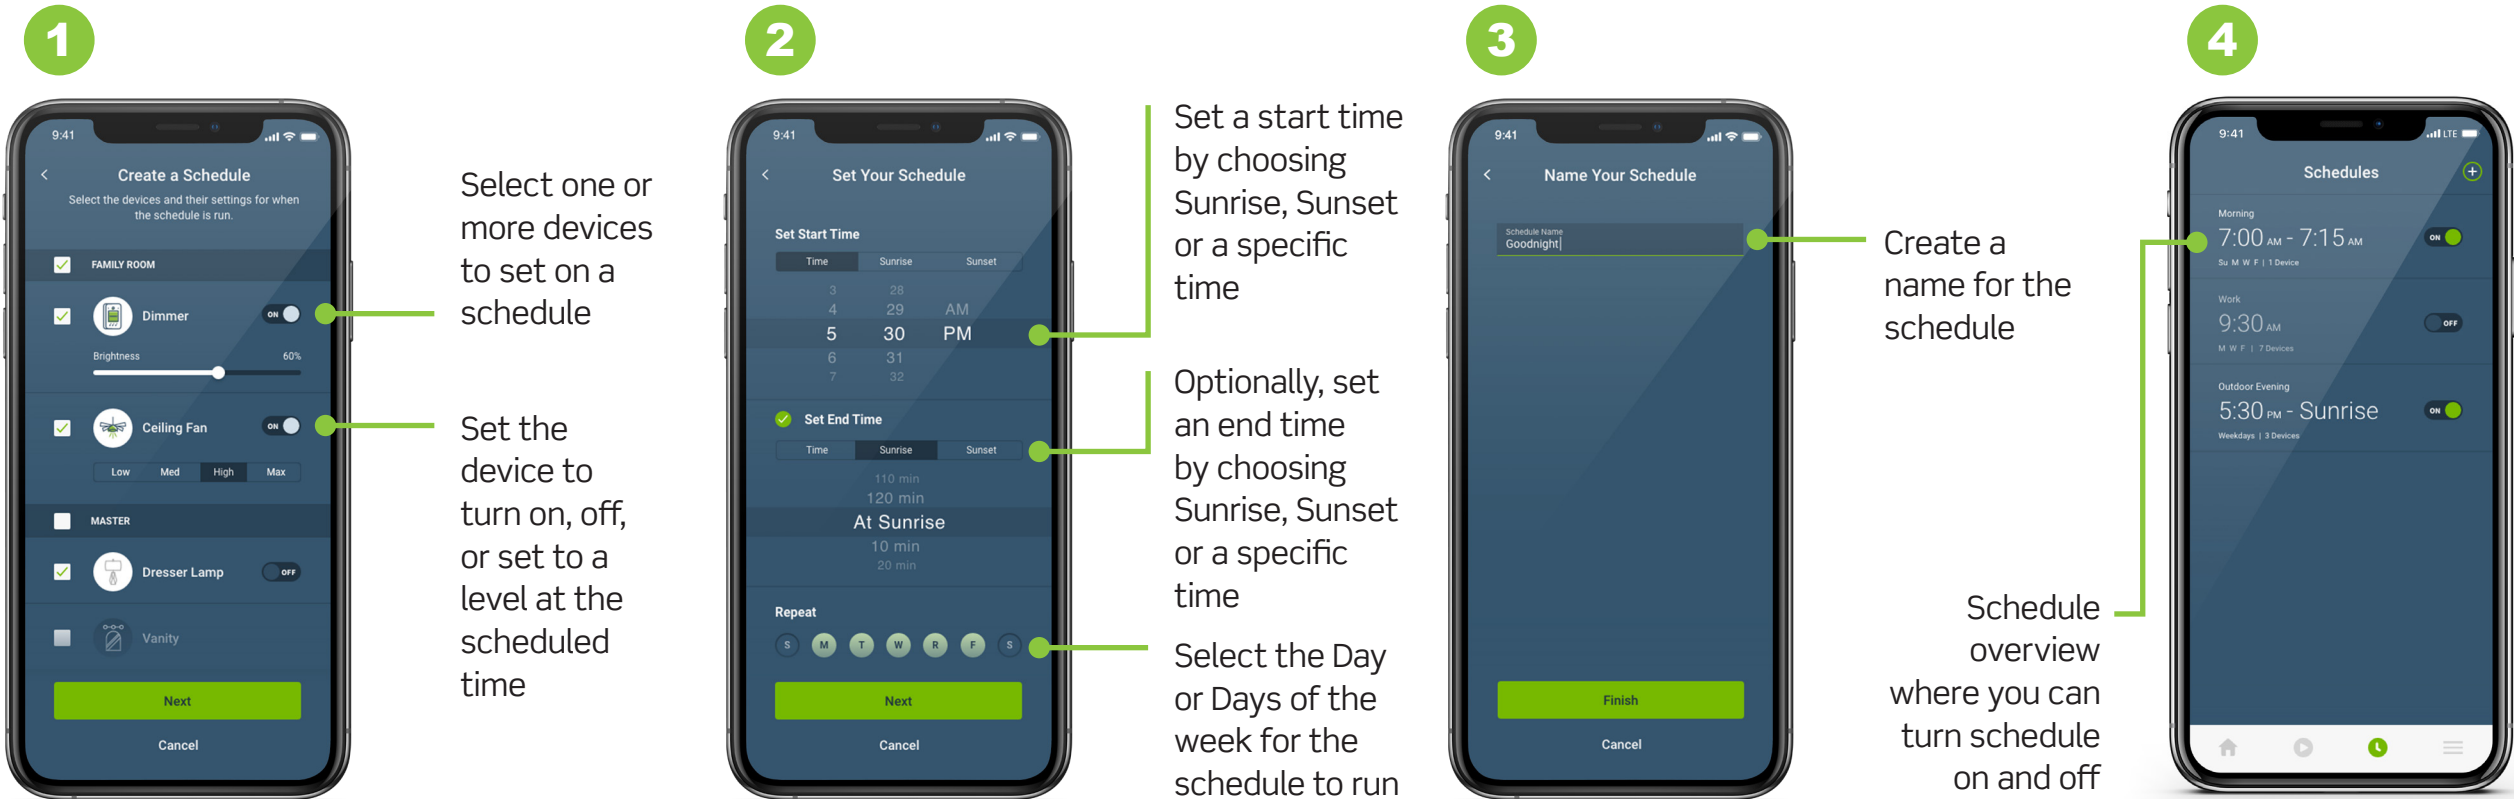

2b

Or, scan the barcode on the Decora Smart Wi-Fi device package

Create a Schedule

Creating a schedule allows you to set your lights, fans and other small appliances to automatically turn on and off at specific times. You can set up one or multiple schedules that activate one or more Decora Smart Wi-Fi devices at a time. If a schedule is turned ON, it will run automatically until it is turned OFF.

LEVITON®

Setting up a schedule

1

Select one or more devices to set on a schedule

Set the device to turn on, off, or set to a level at the scheduled time

2

Set a start time by choosing Sunrise, Sunset or a specific time

Optionally, set an end time by choosing Sunrise, Sunset or a specific time

Select the Day or Days of the week for the schedule to run

3

Create a name for the schedule

4

Schedule overview where you can turn schedule on and off

Command Multiple Devices with Activities

Creating an activity allows you to set your lights, fans and other small appliances to automatically activate upon command. You can set up one or multiple activities that include one or more Decora Smart Wi-Fi devices at a time. The activity will only run if the assigned icon is pressed or by voice command using a voice assistant.

LEVITON®

Setting up an activity

1

Select one or more devices to set an activity

Set the device to turn on, off, or set to a level when the Activity runs

2

Choose the icon that best illustrates the activity

3

Create a name for the activity

4

Advanced Decora Smart Wi-Fi Device Settings

Advanced settings in the My Leviton App allow you to access the features of each device such as dimmer fade rates, min/max light level, bulb types, night settings, auto-off, and more.
LEVITON®

## Customize your lighting experience

1

To access the advanced Dimmer controls, press "Device Settings" and then "Advanced Settings"

2

3

Choose the feature you wish to change and follow prompts in app to customize specific settings for each.
Note: This screen will vary based on the device

(advanced dimmer settings shown)

Set Up Your Dashboard

Control your most important devices, scenes, activities, and energy information all in one place. Use the comprehensive Snapshot widget to see your favorite insights and home controls in a single view. Edit the contents of each widget, hide an entire widget, or re-arrange the order to your liking.
LEVITON®

Widgets: Snapshot and Rooms

1

To edit a widget or to show/hide other widgets, simply tap the cog icon in the top right corner.

Your Snapshot widget will display "Devices On", "Devices Off", and Home/Away modes. Additional options include Active Circuit Breakers, Total Power Usage, and Tripped Breakers.

2

Rooms

ON ◯	ON ◯	◯ OFF
Kitchen	Living Room	Dining Room

Use the Rooms widget to choose and arrange your favorite rooms – include just one or all of them.

To turn an entire room on or off, use the toggle.

Click the three dots to see the status of each device in a room, control those devices, add a new device, or capture the current settings as a room scene.

Set Up Your Dashboard

Control your most important devices, scenes, activities, and energy information all in one place. Use the comprehensive Snapshot widget to see your favorite insights and home controls in a single view. Edit the contents of each widget, hide an entire widget, or re-arrange the order to your liking.
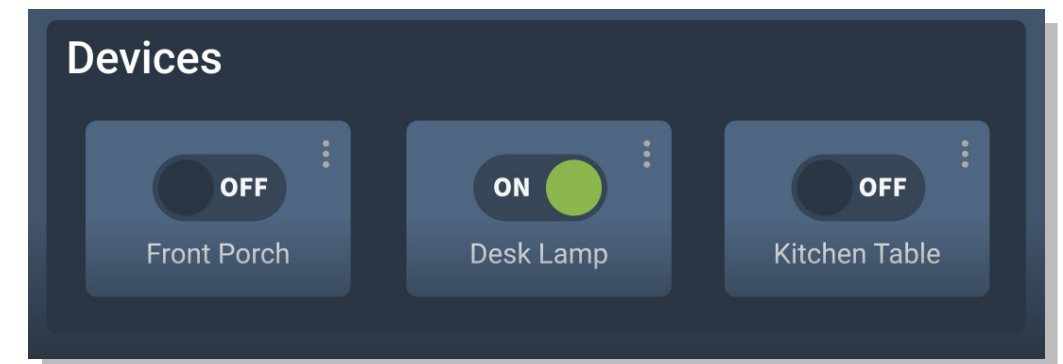

Widgets: Scenes and Devices

3
Room Scenes, if you have them set up, will be shown here. Adjust all lights in the room by pushing the icon.

Scenes

Dinner	Movie Time	Wake Up

4

Devices

OFF	ON	OFF
Front Porch	Desk Lamp	Kitchen Table

Devices widget lets you easily turn a device on/off. Include one or all devices in your list.
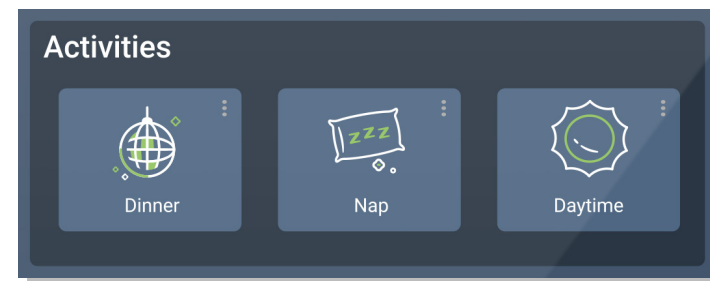

Use the three dots to go to that device's control screen.

Set Up Your Dashboard

Control your most important devices, scenes, activities, and energy information all in one place. Use the comprehensive Snapshot widget to see your favorite insights and home controls in a single view. Edit the contents of each widget, hide an entire widget, or re-arrange the order to your liking.
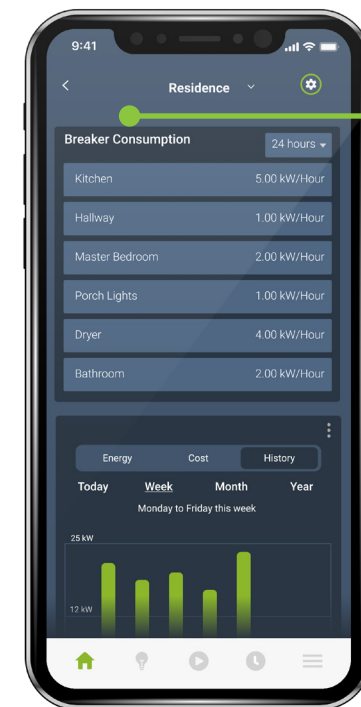

Widgets: Activities and Breaker Consumption

5

Activities

| Dinner | Nap | Daytime |

The Activities widget puts your favorite whole-home Activities front and center. Click the icon to run the Activity and adjust devices throughout your home.

6

Breaker Consumption   24 hours

Kitchen	5.00 kW/Hour
Hallway	1.00 kW/Hour
Master Bedroom	2.00 kW/Hour
Porch Lights	1.00 kW/Hour
Dryer	4.00 kW/Hour
Bathroom	2.00 kW/Hour

Breaker Consumption widget is used to see your top 5 smart breakers based on current energy consumption.

Set Up Your Dashboard

Control your most important devices, scenes, activities, and energy information all in one place. Use the comprehensive Snapshot widget to see your favorite insights and home controls in a single view. Edit the contents of each widget, hide an entire widget, or re-arrange the order to your liking.
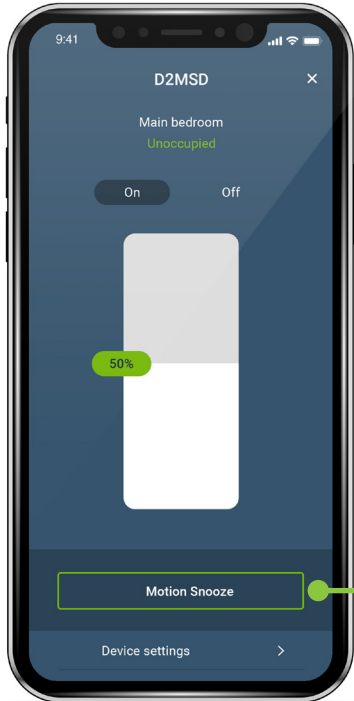

Widget: Event Log
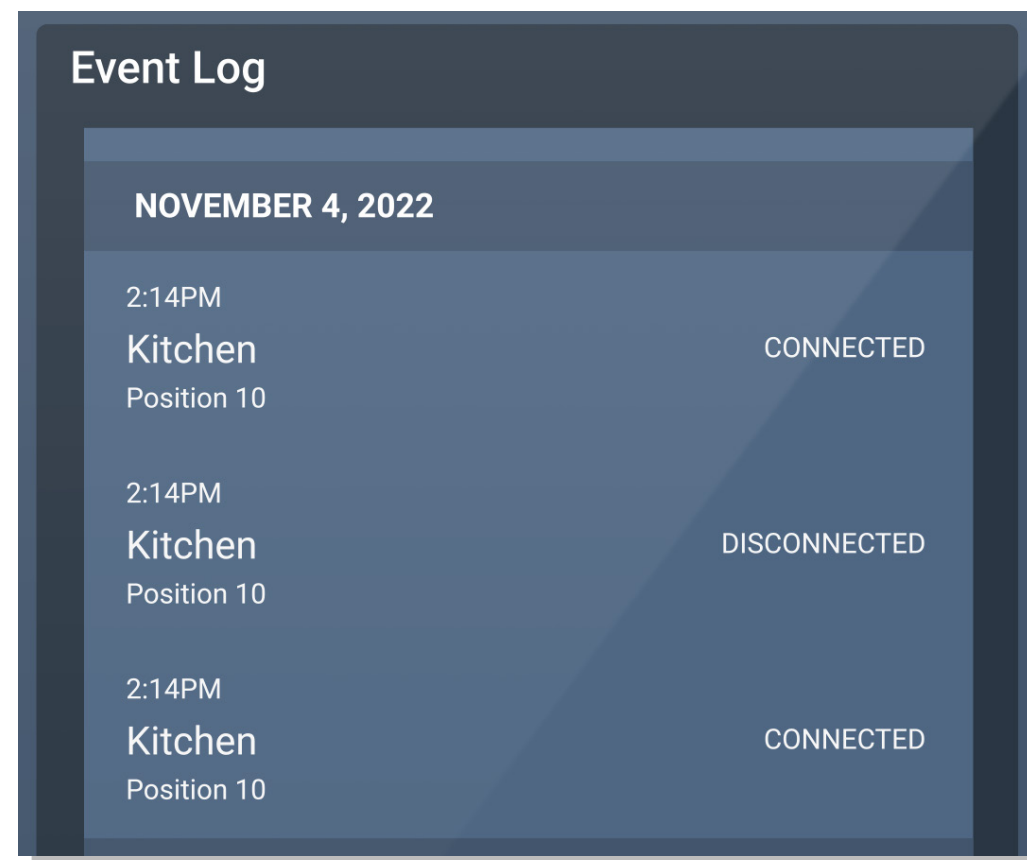

The Leviton Load Center Event Log shows if a breaker has tripped and when. As well, it will log if your smart breakers are disconnected from the Internet.

Advanced Motion Sensing Dimmer Settings

Motion sensor and dimming settings are easily configured through the My Leviton app including Motion Calibration, Night Preset Light Level, Guide Light, Room Occupancy Response, Motion Snooze, Preset Light Level, Return to Last Level, Dimming Range (min dim/max bright) and Fade Rates.
LEVITON®

More than just dimming and motion detection

1

Motion Snooze temporarily pauses motion detection for a selected amount of time

2

Settings screen includes dimming features and new selections for Motion Sensor Options and Night Settings

3

Simple options with in-app descriptions help users understand the device capabilities

Advanced Motion Sensing Dimmer Settings

Motion sensor and dimming settings are easily configured through the My Leviton app including Motion Calibration, Night Preset Light Level, Guide Light, Room Occupancy Response, Motion Snooze, Preset Light Level, Return to Last Level, Dimming Range (min dim/max bright) and Fade Rates.
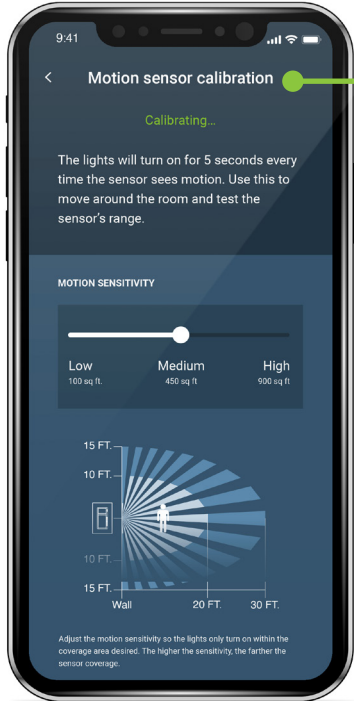

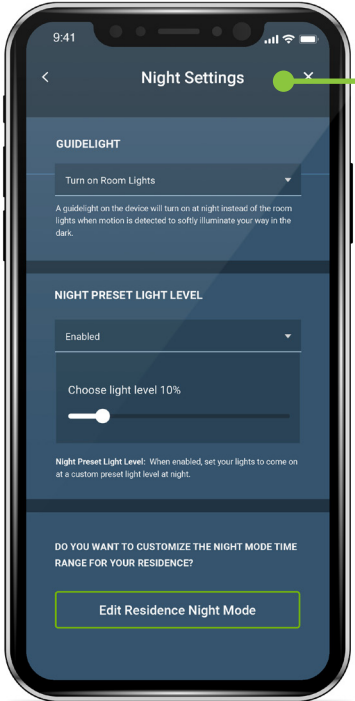

More than just dimming and motion detection

1

The motion calibration tool can be used to select the right sensitivity/coverage range for the environment

2

New Night Settings include a built-in Guidelight to softly illuminate a space at night based on motion or a secondary preset light level when turned on at night

3

Room Occupancy Response – control multiple Decora Smart Wi-Fi devices based on the room's occupancy status; easily include/exclude

Bring it all Together with a Scene Controller Switch

The Scene Controller Switch makes one-button control of the entire home easy to enact and configure. Use this device to turn "All Off" at the end of the night or enact fun scenes like "Movie Time" or "Game Night".
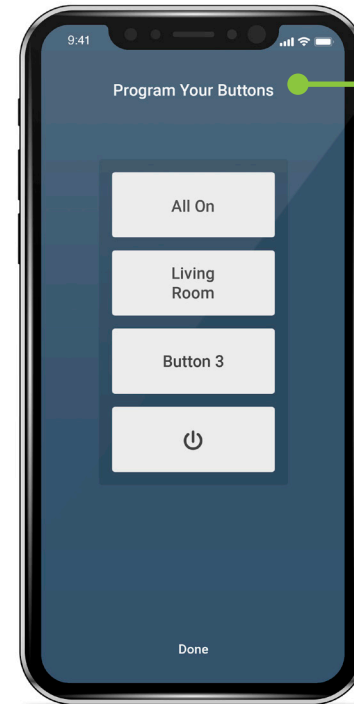

LEVITON®

One-touch control

1

Once enrolled, you can customize your buttons

Program Your Buttons

- Button 1
- Button 2
- Button 3
- ⏻

Do this later

2

At any time, go in and adjust the name of the buttons and what they control

Program Your Buttons

- All On
- Living Room
- Button 3
- ⏻

Done

3

Select Color Change Kit

Customize your 4 Button Controller by choosing a color change kit. A matching wall plate is included. Additional charges apply.

- All On
- Living Room
- Kitchen
- All Off

Use the app to order custom engraved buttons in 6 color options
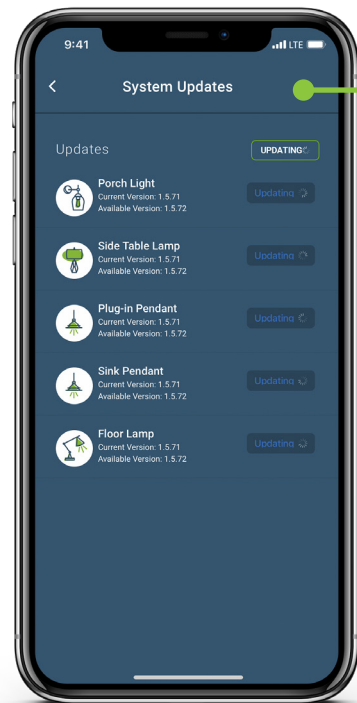

Firmware Updates and Tech Support

Occasionally there may be firmware updates needed to your Decora Smart Wi-Fi devices to help make them even smarter! Can't figure something out? We are here to help with technical assistance information available in the app.
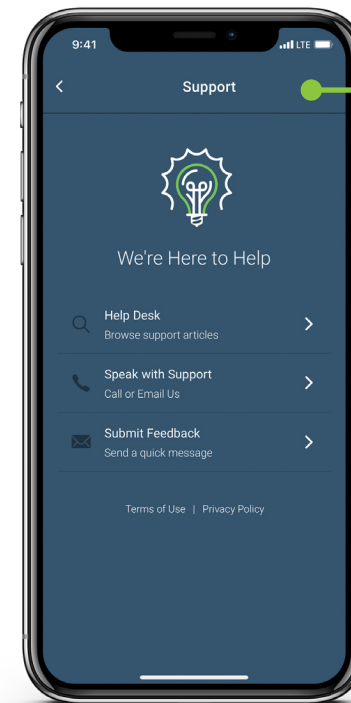

Updates and support

1

On the main screen of the app, firmware updates will be displayed at the top if they're available – click that icon. Update the firmware of individual devices one-by-one, or click "Update All" to update all connected devices

1

Use the hamburger menu to access the in-app support tool. Use the in-app tools to connect with us for technical assistance. Or press the Feedback button to send us a message
THE LEVITON LOAD CENTER SMART BREAKERS
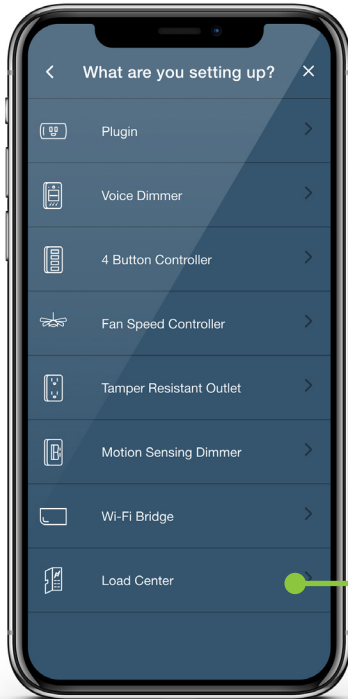

My Leviton App Guide

Add a Leviton Load Center

1

Log in to your My Leviton account. If you don't have one, download the My Leviton app from The App Store or the Google Play store and follow the steps to create an account

2

If you need to add a load center, select the '+' sign in the top right to 'Add a Device' and select Leviton Load Center to add it to your residence. The app will walk you through the configuration process. During this process, you may give your circuit breakers custom names

My Leviton App Guide

Home screen dashboard

1

The main screen for your Load Center shows your current expenditures at a glance. From this screen you can access all of the various Load Center details and settings
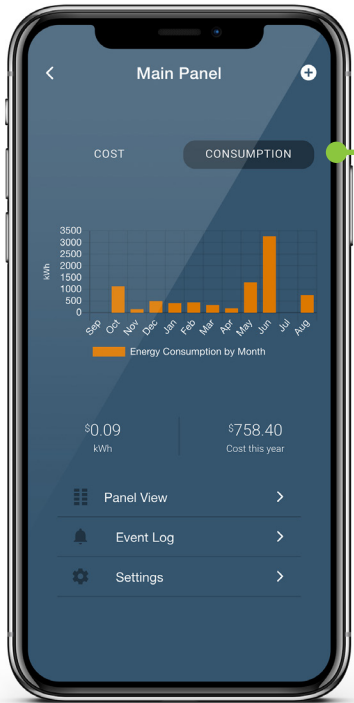

Estimated cost per month

Phase Voltages

Estimated cost year to date

Links to other features and settings are also available from this screen

You can change your electricity rate

Leviton Load Center dashboard

Energy usage

1

The total consumption and costs of energy used can be seen from the consumption screen

Toggle between kw/h energy consumption in a month-by-month chart or compare monthly total tabulations
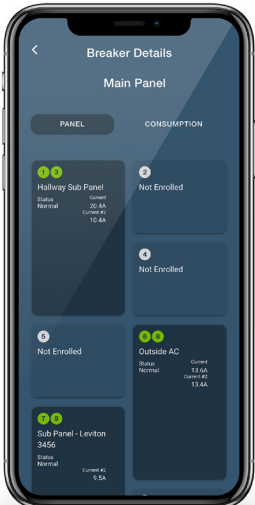

My Leviton App Guide

Breaker details

1

Tap on the Breakers icon to view panel layout and access the breaker settings

2

Tapping on a breaker opens a breaker details screen. From here you can view breaker info, rename it, set the position, edit notification settings, and more

# My Leviton App Guide

Breaker details

3

Identify makes the LED on the Breaker blink

Trip Breaker, must be manually reset

Enabling notifications allows you to set the conditions for receiving notifications
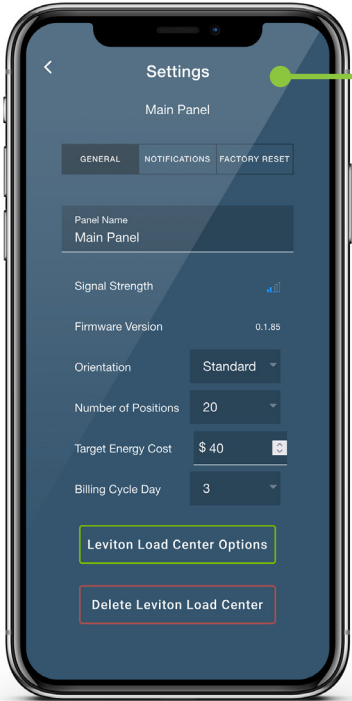

4

Set custom notifications. For example, if a device has been left turned on for a certain duration

My Leviton App Guide

## General settings

1

The General Settings tab allows you to view basic settings and system status

Notifications

1

Under a Load Center's settings, the notifications tab allows you to set the conditions for receiving notifications

Visual Remote Assistant

This tool enables real-time, interactive, and visual engagement with Leviton Technical Service Representatives. Speak with a Leviton Representative about connecting via the Virtual Remote Assistant. Learn more.
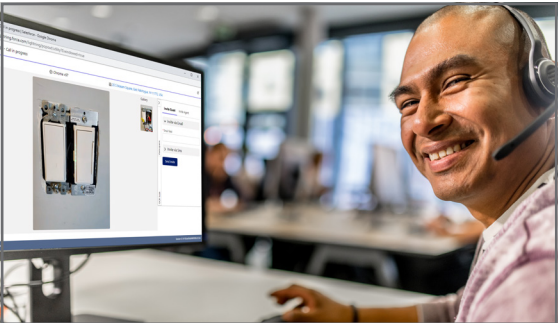

Customer support
CONNECT
Using a secure link, connect directly with a Leviton technical sales representative via video from a mobile device.
SEE
Transmit live video or images of the issue to the representative for Fast, accurate analysis.

GUIDE
Representative walked customer through the troubleshooting process during seamless interaction.

RESOLVE
Diagnosis and troubleshooting through visual engagement results in faster resolution, less downtime and an enhanced customer experience.
