

MODEL TR1 TRU-TRAC® - LINEAR MEASUREMENT SOLUTION

FEATURES

Encoder and measuring wheel solution integrated into one compact unit
 Spring-loaded torsion arm makes wheel pressure adjustments a snap
 Easily installed in a vertical, horizontal, or upside-down orientation
 Operates over a variety of surfaces at speeds up to 3000 feet per minute
 Integrated module simplifies your system design, reducing cost

With operating speeds up to 3000 feet per minute and a wide variety of configuration options, the TR1 Tru-Trac® is the versatile solution for tracking velocity, position, or distance over a wide variety of surfaces in almost any application. An integrated encoder and spring-loaded measuring wheel assembly available in one unit, the TR1 is both easy-to-use and compact. Plus, the TR1 housing is a durable, conductive composite material that will eliminate static build up. Its spring-loaded torsion arm offers adjustable torsion load, allowing the TR1 to be mounted in almost any orientation – even upside-down. And the threaded shaft on the pivot axis is easily reversible in the field, providing mounting access from either side. The TR1 is your solution for a compact, linear encoder.
