

**MICROCHIP**

# TC913A/TC913B

## Dual Auto-Zeroed Operational Amplifiers

### Features:

- First Monolithic Dual Auto-Zeroed Operational Amplifier
- Chopper Amplifier Performance Without External Capacitors:
  - $V_{OS}$ : 15  $\mu$ V Max.
  - $V_{OS}$ : Drift; 0.15  $\mu$ V/ $^{\circ}$ C Max.
  - Saves Cost of External Capacitors
- SOIC Packages Available
- High DC Gain; 120dB
- Low Supply Current; 650  $\mu$ A
- Low Input Voltage Noise:
  - 0.65  $\mu$ V<sub>P-P</sub> (0.1 Hz to 10 Hz)
- Wide Common Mode Voltage Range:
  - $V_{SS}$  to  $V_{DD}$  - 2V
- High Common Mode Rejection; 116dB
- Dual or Single Supply Operation:
  - $\pm 3.3$ V to  $\pm 8.3$ V
  - +6.5V to +16V
- Excellent AC Operating Characteristics:
  - Slew Rate; 2.5V/ $\mu$ sec
  - Unity-Gain Bandwidth; 1.5 MHz
- Pin Compatible with LM358, OP-14, MC1458, ICL7621, TL082, TLC322

### Applications:

- Instrumentation
- Medical Instrumentation
- Embedded Control
- Temperature Sensor Amplifier
- Strain Gage Amplifier

### Device Selection Table

| Part Number | Package    | Temp. Range                        | Offset Voltage |
|-------------|------------|------------------------------------|----------------|
| TC913ACOA   | 8-Pin SOIC | 0 $^{\circ}$ C to +70 $^{\circ}$ C | 15 $\mu$ V     |
| TC913ACPA   | 8-Pin PDIP | 0 $^{\circ}$ C to +70 $^{\circ}$ C | 15 $\mu$ V     |
| TC913BCOA   | 8-Pin SOIC | 0 $^{\circ}$ C to +70 $^{\circ}$ C | 30 $\mu$ V     |
| TC913BCPA   | 8-Pin PDIP | 0 $^{\circ}$ C to +70 $^{\circ}$ C | 30 $\mu$ V     |

### Package Type

### General Description:

The TC913 is the world's first complete monolithic, dual auto-zeroed operational amplifier. The TC913 sets a new standard for low-power, precision dual-operational amplifiers. Chopper-stabilized or auto-zeroed amplifiers offer low offset voltage errors by periodically sampling offset error, and storing correction voltages on capacitors. Previous single amplifier designs required two user-supplied, external 0.1 $\mu$ F error storage correction capacitors — much too large for on-chip integration. The unique TC913 architecture requires smaller capacitors, making on-chip integration possible. Microvolt offset levels are achieved and **external capacitors are not required**.

The TC913 system benefits are apparent when contrasted with a TC7650 chopper amplifier circuit implementation. A single TC913 replaces two TC7650's and four capacitors. Five components and assembly steps are eliminated.

The TC913 pinout matches many popular dual-operational amplifiers: OP-04, TLC322, LM358, and ICL7621 are typical examples. In many applications, operating from dual 5V power supplies or single supplies, the TC913 offers superior electrical performance, and can be a functional drop-in replacement; printed circuit board rework is not necessary. The TC913's low offset voltage error eliminates offset voltage trim potentiometers often needed with bipolar and low accuracy CMOS operational amplifiers.

The TC913 takes full advantage of Microchip's proprietary CMOS technology. Unity gain bandwidth is 1.5 MHz and slew rate is 2.5V/ $\mu$ sec.

## 1.0 ELECTRICAL CHARACTERISTICS

### Absolute Maximum Ratings\*

|  |                 |
|--|-----------------|
| Total Supply Voltage ( $V_{DD}$ to $V_{SS}$ ) .....            | +18V            |
| Input Voltage ..... ( $V_{DD} + 0.3V$ ) to ( $V_{SS} - 0.3V$ ) |                 |
| Current Into Any Pin.....                                      | 10 mA           |
| While Operating .....  | 100 $\mu$ A     |
| Package Power Dissipation ( $T_A = 70^\circ\text{C}$ )         |                 |
| Plastic DIP .....  | 730 mW          |
| Plastic SOIC .....   | 470 mW          |
| Operating Temperature Range                                    |                 |
| C Device .....   | 0°C to +70°C    |
| Storage Temperature Range .....                                | -65°C to +150°C |

\*Stresses above those listed under "Absolute Maximum Ratings" may cause permanent damage to the device. These are stress ratings only and functional operation of the device at these or any other conditions above those indicated in the operation sections of the specifications is not implied. Exposure to Absolute Maximum Rating conditions for extended periods may affect device reliability.

## TC913A AND TC913B ELECTRICAL SPECIFICATIONS

## 5.0 PACKAGING INFORMATION

### 5.1 Package Marking Information

Package marking data not available at this time.

### 5.2 Taping Form

#### Component Taping Orientation for 8-Pin SOIC (Narrow) Devices

Standard Reel Component Orientation  
for 713 Suffix Device

#### Carrier Tape, Number of Components Per Reel and Reel Size

| Package        | Carrier Width (W) | Pitch (P) | Part Per Full Reel | Reel Size |
|----------------|-------------------|-----------|--------------------|-----------|
| 8-Pin SOIC (N) | 12 mm             | 8 mm      | 2500               | 13 in     |

# TC913A/TC913B

## 5.3 Package Dimensions

**8-Pin SOIC**

Dimensions: inches (mm)

**8-Pin Plastic DIP**

Dimensions: inches (mm)
