

### **NEW!** Turn-Tell™ Labels

Panduit innovative Turn-Tell™ Labels provide a unique identification solution to meet the application needs of data centers, industrial automation, and other structured cabling infrastructures. These new pressure-sensitive, self-laminating labels improve visibility, placement, aesthetics, and flexibility of the labeling application. The labels are unique because they can rotate on the wire/cable after installation to allow visibility from any angle. In addition, they allow repositioning along the length of the cable which further improves ease of installation and flexibility in high density or space restrained applications. Installers will save time and material by being able to reposition the label after pulling the wire/cable and cutting it to final length for termination.

Offered in a wide range of sizes, the new Turn-Tell™ Labels are available in P1™ Cassettes for the PanTher™ LS8E and LS8EQ Hand-Held Thermal Transfer Printers. They are also offered in computer printable rolls, ready to print on demand using Panduit® Easy-Mark™ Labeling Software and desktop thermal transfer printers.

#### **Key Features**

#### **Benefits**

<b><i>Innovative design allows label to be moved after installation</i></b>	Allows labels to rotate for visibility from any angle, and allows repositioning on the wire/cable to align legends for improved aesthetics  Labels can be easily repositioned once installed on the wire/cable to save time and cost associated with relabeling; ideal for use in high density or space constrained cable applications
<b><i>Wrap-around wire/cable label</i></b>	Permits labels to be installed on terminated wires/cables without disconnecting for increased productivity, performance, and cost savings
<b><i>Perforated adhesive backed anchor</i></b>	Facilitates easy installation; prevents unintended movement in vertical or high vibration applications for superior performance
<b><i>On-demand labeling solution</i></b>	Labels can be printed in the office using desktop thermal transfer printers or in the field using the PanTher™ LS8E or LS8EQ Hand-Held Thermal Transfer Printers; more cost effective than pre-printed solutions
<b><i>Thermal transfer print technology</i></b>	Provides crisp, clear, and durable legends for a reliable, high performance identification solution

## How It Works

- 

Remove the label from the liner by lifting it at the non-adhesive middle section.
- 

Apply the top adhesive backed anchor section to the cable. For proper operation, the label should be applied squarely to the cable to avoid an uneven wrap.
- 

Wrap the label around the cable repeatedly until completely wrapped.
- 

Once the label is completely applied to the cable, pinch lightly and rotate it in the same direction as you wrapped it. This will break the label perforation and separate the label from the anchor.
- 

After the label is installed and detached from the anchor, it is free to rotate and slide on the cable. The anchor can be used as a stop to prevent unintended label movement in vertical or high vibration applications.

**Adhesive backed anchor**
