Photoelectric Sensors

Enhanced 50 Series™

The new Enhanced versions of the Cutler-Hammer® 50 Series™ Photoelectric Sensors from Eaton's electrical business offer flexibility, durability and high optical performance in a cost-effective self-contained package. Choose from three output types, four time delay functions, six sensing modes and four connection styles to tailor the sensor to exactly meet your needs.

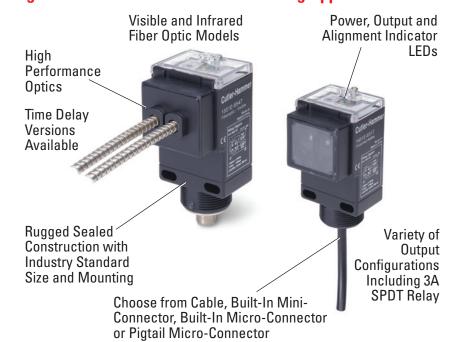

Sensors are available in thru-beam, reflex, polarized reflex, diffuse reflective, clear object, and fiber optic sensing modes. Brackets are available for easy mounting and to allow precise adjustment of sensor alignment.

# **Approvals**

- CSA Approved
- Certified to UL Standard, UL 508

 $\epsilon$ 

# **High Performance Sensors for Demanding Applications**

## **Product Features**

- High optical performance models including a 500-foot (152m) Thru-Beam and a 10-foot (3m) Diffuse Reflective unit
- Output options include a 3 Amp SPDT relay
- All units offer light/dark selection
- Logic options include ON-delay, OFF-delay and One-Shot delay
- Fiber optic sensors operate in thru-beam or diffuse reflective mode depending on the fiber optic cable selected
- Fully potted construction for use in areas subject to washdown, high shock and/or vibration
- Choice of pre-wired power cable, built-in mini-connector, built-in microconnector and pigtail micro-connector versions. Standard pre-wired cable length is 6 feet (1.8m)
- Variety of brackets available including ball swivel

 $<sup>^{\</sup>circlearrowleft}$  For brackets compatible with these sensors, see Accessories on Page 5-19.

Fast turn product with typical one business day lead-time to shipment.

③ See listing of compatible connector cables on Page 5-14.

Stocked product, typical order quantities guaranteed in stock.

- ① Connect load to appropriate output for either sinking or sourcing operation.
- ② Connecting the Test input to 0V DC allows you to switch the light source off for troubleshooting while leaving the sensor under power.
- (9) Over current protection is to be provided in the field. Conductor size for 20 AWG: 5 amp; 22 AWG: 3 amp; 24 AWG: 2 amp.
