

Series G Handle Mechanisms

Through-the-Door Handle Mechanisms

Universal Rotary

All rotary handle mechanisms include a handle "Lock Off," to prevent turning the breaker ON while in the OFF position. All Rotary handles indicate ON/OFF/Tripped/Reset positions, however, Universal Rotary has the added feature of international markings for ON (I) and OFF (O). The Universal Rotary is made of moulded material.

The Universal Rotary mechanisms for GE, GJ and GL MCCBs can be operated by hand with the door open or "locked off" to prevent operation with the door open.
