# Accessories

## GENERAL INFORMATION

Altech accessories are available as optional equipment to assist in the use of sensor products. Some sensor products require specific accessory units in order to perform satisfactory. Please consult the product specification to determine which accessories are essential.

The accessories include mounting brackets, cable assemblies, switching amplifier units, and motion detector systems.

## MOUNTING BRACKETS

Several fixtures are available that provide the ability to mount cylindrical and limit style sensors.

## CABLE ASSEMBLIES

Altech offers one of the largest Quick Disconnect selection of sensors in the industry and matching cable assemblies. Standard Sensors come with 2 meter fixed PVC cables, but to improve maintenance and mean time to repair (MTTR) quick disconnect sensors with matching cable assemblies are desirable.

For DC Sensors Altech offers a mini- style 4-pin cable assembly, a micro style 3- and 4-pin cable assembly, and a

pico style 3-pin cable assembly. Most are available in straight or 90° molded cable connection, and the micro and pico styles are also available with 2 LED's.

For AC Sensors Altech offers a mini- style 3-pin cable assembly, a micro style 3-pin and 4-pin cable assembly.

## SWITCHING/AMPLIFIER UNITS

Altech offers a wide variety of products used in conjunction with Ring Sensors, Analog Sensors, Namur Sensors, testers and power supply modules for all sensor products.

## MOTION DETECTOR SYSTEMS

Motion detectors accept impulses from proximity sensors when a repetitious event is occurring. These impulses are measured compared to a standard. The motion detector will "Time Out" between impulses and provide an output for over or under the set speed.

Altech offers completely contained motion detector systems, including built-in proximity sensors or as separate components.

# Accessories

## Mounting Brackets 9512-6100/9512-6200 9512-6400/9512-6600

Non-metallic mounting brackets are used for 8mm (.31 in.), 12mm (.47 in.), 18mm (.71 in.), and 30mm (1.18mm) cylindrical sensors.

Dimensions in mm (in.)

D=SENSOR Ø	A	B	C	E	F	Model
8 (0.31)	64 (2.52)	50 (2.0)	37 (1.46)	27 (1.06)	20 (0.79)	9512-6100
12 (0.47in.)	64 (2.52)	50 (2.0)	37 (1.46)	27 (1.06)	20 (0.79)	9512-6200
18 (0.71in.)	70 (2.76)	56 (2.20)	42 (1.65)	33 (1.3)	26 (1.02)	9512-6400
30 (1.18in.)	87 (3.43)	73 (2.87)	58 (2.28)	42 (1.65)	40 (1.57)	9512-6600

## Model No. MB 1

A Metallic Mounting Bracket is available for 12mm (.47 in.) and 18mm (.071 in.) cylindrical sensors. Bracket is finished in clear anodized Aluminum.

This bracket allows for adjustment forward, backward, and sensor height.

# Accessories

## 9512-8200 Mounting Plate for Limit Style Sensors

Mounting dimensions: According to DIN 50 027/037  
Material: VA 1.4301.

This mounting plate is used if the sensing device has to be adjusted after the installation.

**This mounting plate is used only for Limit Style Sensors.**

8300-0100/0500

## Power and Switching Units for NPN and PNP sensors

- **Short circuit protection**
- **Temperature range:**  
-10 to 50°C (14 - 122°F)
- **Type 8300-0100: 230V**
- **Type 8300-0500: 110V**
- **LED for Output Energized**

The Universal Power and Switching Unit is used to supply power for sensors and provide a relay output of the sensor status.

The unit is DIN rail mountable and can supply power for one NPN or PNP sensor.

### Standard Data

Cat. No.	8300-0100	8300/0500
Supply Voltage:	230V AC	110V AC
Operating Frequency:	50/60Hz	50/60Hz
Temperature Range:	-10°C up to +50°C	-10°C up to +50°C
Output Voltage: (for sensor supply)	24V, stabilized and short circuit-proof	24V, stabilized and short circuit-proof
Max. Load Current:	120mA	120mA
Relay Output:	SPDT	SPDT
Max. Switching Voltage:	250V AC	250V AC
Max. Switching Current:	5A (ohmic load)	5A (ohmic load)
Max. Switching Capacity:	1100VA	1100VA

## Accessories

### 8100-2200

### Power and Switching Units for Namur sensors

- Power supply unit
- Temperature range: -10 to 70°C (14 - 158°F)
- Amplifier
- Relay Output
- Drives one Namur sensor

Namur sensors operate with a supply voltage of 8.2V. Therefore, Namur sensors are mostly operated with switching units (with a current interface according to DIN 19234). The 8100-2200 Namur Switching Unit is equipped with such an interface.

The Namur sensor has a low impedance with no metal target detected. When a metal target is detected the impedance is higher. This change in impedance causes current change which is detected by the switching unit.

The 8100-2200 switching unit opens up application areas such as standard proximity switches to Namur sensors. This is supported by the small overall dimensions of the Namur sensors.

#### Standard Data

Cat. No.	8100-2200
Supply Voltage:	220V/110V AC
Operating Frequency:	50/60Hz
Temperature Range:	-10°C up to +70°C (14 to 158°F)
Output Voltage: (for sensor supply)	8.2V
Relay Output:	SPDT
Switching Voltage:	250V AC
Switching Current:	5A (resistive)
Max. Switching Capacity:	1100VA

## 8102-0900/0930 Power and Switching Units for High Sensitive Ring Sensors

This switching amplifier is used with ALTECH Dynamic Ring Sensors. It can also be used as a time delay for NPN sensors since it contains a delay function. Both a transistor output and relay contact output are available.

- Adjustable Pulse Duration of the output signal
- Short circuit protection
- Transistor Output and a relay output
- LED for Output Energized
- Type 8102-0900: 220V
- Type 8100-0930: 110V
- Temperature range: -10 to 50°C (14 - 122°F)
- Adjustable Output timing delay of 10 msec to 18 seconds

### Standard Data

Cat. No.	8102-0930	8102-0900
Supply Voltage:	220V AC	110V AC
Operating Frequency:	50/60Hz	50/60Hz
Temperature Range:	-10°C up to +50°C	-10°C up to +50°C
Output Voltage: (for sensor supply)	24V, stabilized and short circuit-proof	24V, stabilized and short circuit-proof
Transistor Output:		
Max. Load Current	80mA	80mA
Voltage Drop	0.5V	0.5V
Leakage Current	≤10μA	≤10μA
Relay Output:	SPDT	SPDT

## 8100-2100/2130 Power and Switching Units for Analog Sensors

- Provides 24V DC for Sensors
- Choice of 4 Outputs
  - Analog Voltage
  - Analog Current
  - 4 Bit Digital
  - Relays (3) with LED indicators
- Compatible with all Altech Analog Sensors

The multi-function amplifier Type 8100-2100/2130 operates in conjunction with either one of the analog sensors 9914-0800, 9414-0800, 9414-0900, 9914-1000, 9814-1133, 9814-2133, 9714-2000 or 9714-4300. It contains a power supply for the sensor voltage (24V DC) and converts the analog signal of the sensors to four different outputs.

1. Analog voltage output:  
0-10V DC, max 5mA.
2. Analog current output:  
0-20mA, max. load resistance 500Ω.
3. Digital Output:  
four bit, open collector, npn, "active low".
4. Relay Output:  
3 relays for triggering point are built in (change over contact, SPDT).  
Load voltage: 220V AC  
Load current: 5A (resistive)  
Switching capacity: 1100VA  
The switching point of each relay can be adjusted by a potentiometer and is indicated by individual LED's.  
Settings:  
Three Relays with switching thresholds can be chosen by means of three integrated potentiometers. When reaching the switching threshold, the corresponding LED will light up.

In addition to Units 8100-2100 and 8100-2130, there are two Analog Modules available to be mounted onto DIN/EN mounting rails.

- Module 8100-2400 with:
  - Analog voltage output
  - Analog current output
  - 4-bit digital output
- Module 8100-2500 with:
  - 8-bit digital output

Modules 8100-2400 and 8100-2500 are described on page 126.

### Standard Data

Cat. No.	8100-2100	8100/2130
Supply Voltage:	220V AC	110V AC
Operating Frequency:	50/60Hz	50/60Hz
Temperature Range:	-10°C up to +60°C (32 - 140°F)	-10°C up to +60°C (32 - 140°F)

# Accessories

## 8100-2400/8100-2500 Analog Input Multi-Function Switching Unit

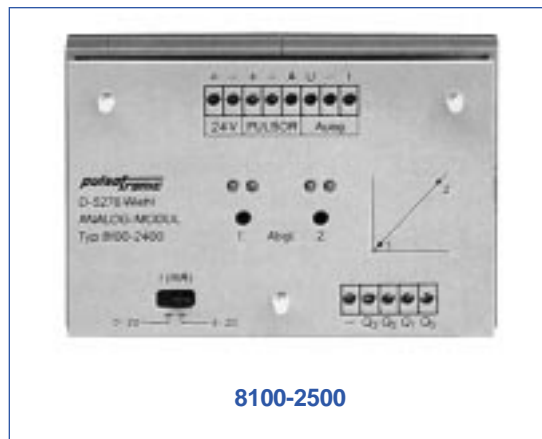

- 8100-2400 has choice of 3 outputs
  - Analog Voltage
  - Analog Current
  - 4 Bit Digital
- 8100-2500 has an 8 bit digital output
- Output protected against short circuits and polarity reversal

The Multifunction Amplifiers Type 8100-2400 and 8100-2500 operate in conjunction with either one of the Analog sensors 9914-0800, 9914-1000, 9914-1133, 9814-2133, 9714-2000 or 9714-4300. It operates with customer supplied DC voltage, 18-30V DC, and converts the analog signal to three (3) different outputs for the 8100-2400. The 8100-2500 has one output, an 8 bit digital output.

The 8100-2500, 8-bit digital output divides the analog voltage into 256 individual increments which results in a resolution of 10µm/bit (.0004 in./bit). All outputs are protected against short circuits, and the unit is protected from Polarity reversal.

### Standard Data

Cat. No.	8100-2400	8100-2500
Supply Voltage:	18-30V DC	18-30V DC
Temperature Range:	0 to 60°C (32 to 140°F)	0 to 60°C (32 to 140°F)
Analog Voltage Output:	0 to 10V	–
Analog Current Output:	0 to 20mA or 4 to 20mA (jumper)	–

## Accessories

8309-0130/8309-0230

Testers for DC and  
AC Sensors

- Tests an inductive sensors field in place, without removing the sensor
- Tests the output circuit
- Identifies the sensor output as either sink (NPN) or source (PNP) for DC sensors

These testers can greatly reduce down-time and maintenance costs by quickly checking the proper function of all kinds of inductive capacitive, or photoelectric sensors.

## 9863-4300/4400/4600 Motion Detector Systems

- **9 position sensor head adjustment simplifies adaptation to conditions**
- **Programmable NO/NC outputs**
- **Speed range of 100 - 3000 pulses per minute**
- **Startup delay 0.5 - 6.0 seconds, adjustable**
- **2 LED's for Output Energized & Operating Voltage**
- **IP67 Protection (NEMA 1,3,4,6,12,13) Protection**

These Motion Detecting Systems in Limit Style housing are used to control the rotational speed of motors, pumps, and conveyor drives. They are completely self-contained, with an integral proximity switch and timing functions to perform over and under speed detection. Typical targets are cam lobes, sprocket teeth, or small tabs.

### Standard Data

**8303-0430**

## Motion Detector in Universal Housing

- Operates on DC supply voltage
- 3 Speed Ranges
- System start-up delay adjustable

This motion detector detects the rotational speed of actuation, rotating shafts or other movements such as lifting or pushing. The impulse can be given by any PNP or NPN DC-sensor. The impulse is effected by control cams, gears, wheels or other signals. The housing can be mounted on a DIN/EN rail or on a mounting plate.

### Standard Data

Cat. No.	8303-0430
Supply Voltage:	18V - 30V
Temperature Range:	-10°C up to +60°C
5 speed range:	6 - 60 rpm 60 - 600 rpm 600 - 6000 rpm

## 8100-2700/2800 Motion Detector in Universal Snap-on Housing

- **System start-up delay adjustment**
- **3 Speed ranges with adjustment to set speed**
- **DC Supply Voltage**
- **Relay Output**

These units monitor/control electronically the speed of drives, rotating shafts or other motions. Both inductive and other three-wire DC voltage proximity switches can be used as pulse generator input to this motion detector. Pulse generation is effected e.g. by rotating control cams, gear-wheels or other signal targets. The housing can be snapped on to DIN/EN mounting rails or threaded to mounting plates.

### Standard Data

Cat. No.	8100-2700	8100-2800
Supply voltage (polarity reversal)	18V - 30V DC	18V - 30V DC
Supply Current:	≤50mA at 24V	–
Inputs:	NPN or PNP sensor signal	NPN or PNP sensor signal
Analog Output Voltage:	–	1V - 10V load resistance min 2KΩ
Analog Current Output:	–	adjustable 4-20mA load resistance 0-500Ω
Relay Output:		
Current Carrying Capacity:	250V/5A	250V/5A
Normally Open/Closed Selectable via Plug::	In NO position, the relay will be activated, if the set speed is exceeded. In NC position, the relay will be activated if the speed falls below the set	In NO position the relay will be activated, if the set speed is exceeded
Speed Ranges:	6 - 60 rpm 60 - 600 rpm 600 - 6000 rpm	10 - 100 rpm 100 - 1000 rpm 1000 - 10000 rpm
Starting Delay Adjustable:	0.5 - 10 sec.	1 - 10 sec
Hysteresis Adjustable:	5 - 10%	1 - 10%
LED Switching State Indication:	activated same time as relay	activated same time as relay
Temperature Range:	-0°C to +60°C (32-140°F)	-0°C to +60°C (32-140°F)

## THE NEWEST ADDITION TO ALTECH'S SENSOR PRODUCTS...

### Pulsotronic Capacitive, Photo-electric, and Ultrasonic Sensors.

ALTECH now offers a comprehensive line of Capacitive, Photo-electric, and Ultrasonic Sensors to satisfy the expanding Automation Industry.

These new Sensors are available in DC (PNP & NPN), and AC models. Housing styles are Cylindrical, Limit Style, and Block.

#### *Features:*

- ***Capacitive – Detects Metals, Non-Metals, and Liquids.***
  - ***Photo-electric – Available in Diffuse Reflection, Retro-Reflection, and Through Beam models.***
  - ***Ultrasonic – Digital and Analog models available, using sound to detect targets and target distances.***

*...Contact Altech for more information*
