3M Triccicical Spring Connectors 512 Ser C C (5

2-10#18, 2-7#16, 1-6#14, 1-5#12, 1-3#10, 1-2#8, 1#6 AWG. Designed for speed and efficiency, these connectors spin-on quickly and tighten-down easily. They're engineered for easy back-off, too. The live inner spring action delivers uniform holding power.

3M 512 Electrical Spring Connectors

Data Sheet

Application

Use a 512 connector to electrically connect two or more wire ends in a pigtail application and insulate the connection, or to insulate a single wire end.

Wire Range

AWG Range: Solid or stranded copper conductors only. No. 20 thru No. 8 (0,75 mm² thru 6,0 mm²).

Construction

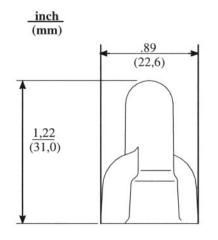

Spring - Spring Steel, Corrosion Resistant Coating Insulator - Flame Retardant Nylon Color - Red

Weight

.006 lb. (2,7 gm)

Engineering Specification

Electrical Spring Connector (as manufactured by 3M, part No. 512) shall be capable of connecting wires within the range of No. 20 thru No. 8 solid or stranded copper conductors in a pigtail application. The connector shall be constructed of an active (live) spring and covered by a polypropylene insulator. The spring shall have a corrosion resistant coating. The connector shall be UL Listed as a pressure cable connector and be CSA Certified. The connectors shall be voltage rated 600 volts maximum, building wire,

1000 volts maximum signs, fixtures, and luminaires. The connector shall have a maximum operating temperature of 105° C.

Regulatory Agencies

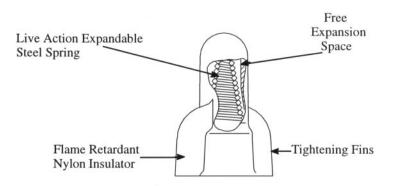

UL Listed as a Pressure Cable Connector Tested per UL Standard 486C UL File No. E23438

CSA Certified-CSA Standard C22.2 No. 0, 188-M1983 CSA File No. LR15503 Operating Temperature: 105°C (221°F) Voltage Rating: 600 volts max. building wire 1000 volts max. signs and luminaires. Flammability Rating: C22.2 No. 0.6 V-2

Classified in accordance with **IEC** (International Electrotechnical Commission) publications 685-1 and 685-2-4. UL-IEC file No. E95240. Operating Temperature: 105°C (221°F) Voltage Rating: 600 volts max. building wire; 1000 volts max. signs and fixtures Flammability Rating: UL94 V-2

 $\Box = 300 \text{ volts}$ $\bullet = 600 \text{ volts}$

All wire combinations are 600 volt UL Listed when using conductors

Installation Instructions

Turn power off before installing or removing terminal. All electrical work should be done according to appropriate electrical codes.

- 1. Strip wire insulation to length specified in chart to the right, according to conductor size.
- 2. Firmly grasp wires, making sure insulation ends are even and tightly bundled. (wires may be twisted or untwisted). Slip connector over wire tips.
- 3. Turn connector onto wires in a clockwise direction until secure.
- 4. To remove, turn connector counter-clockwise.

Conductor Size	Strip Length
20-16 AWG (0,75-1,5 mm ²)	3/4" (19,0 mm)
14-8 AWG (2,5-4,0 mm ²)	5/8" (15,9 mm)

Metric Wire Combinations

International Electrotechnical Commission

Rated Capacity: 2,0-16,0 mm² Voltage Rating: 600 volts maximum Reusability: Reusable for same capacity or larger Wire Type: Copper only

See installation instructions for conductor strip lengths.

I.E.C. Metric Wire Matrix: Twist-on connecting devices for the combination of rigid (solid or stranded) and flexible conductors.

Conductor Size	Quantity
0.75 mm ²	3-6
1,0 mm ²	2-6
1,5 mm ²	2-6
2,5 mm ²	2-6
4,0 mm ²	2-4
6,0 mm ²	2

Only AWG combinations are UL Listed or CSA Certified.
