Estimated Shipping Weight: 0.02 Pounds

If you have an ESD Badge Holder, send it to us and we will test it at No Charge and send you a Menda one at No Charge!

“It should be understood that any object, item, material or person could be a source of static electricity in the work environment. Removal of unnecessary nonconductors, replacing nonconductive materials with dissipative or conductive materials and grounding all conductors are the principle methods of controlling static electricity in the workplace, regardless of the activity.” [ESD Handbook ESD TR20.20-2008 section 2.4 Sources of Static Electricity]
