## TV-15, 30 AMP (1 Form A)

 Power Relay
## HE RELAYS

1 Form A Plug-in type

## FEATURES

1. Excellent resistance to contact welding
Owing to the pre-tension and kick-off mechanism, the 1 Form A passes TV-15 and the 2 Form A passes TV-10.
2. High-capacity and long life

| Mechanical life <br> (at 180 cpm ) | DC type: $10^{7}$, AC type: $5 \times 10^{6}$ |  |

## 3. Excellent surge resistance

Between contacts and coil, the surge voltage is more than $10,000 \mathrm{~V}$ (when surge waveform accords with JEC-212-1981).
4. Compatible with all major safety standards
UL, CSA, VDE and TÜV certified

## PRE-TENSION AND KICK-OFF MECHANISM

## 1. Pre-tension mechanism

Before operation, the moving spring is pre-tensioned by being held down by a moving plate. As a result, at the ON moment, with little follow, contact pressure is ensured

At operation

2. Kick-off mechanism

Even when contact welding has occurred, at the moment of return, the moving plate taps the moving spring (kick-off) and, in effect, works to tear the weld apart, thus improving resistance to welding.
