SBS® Connectors - up to 110 amps

Touch Safe Interface
 Can safely be used in:

threatening.

- Can safely be used in through panel applications

circuit interruption (hot plugging).

- Minimizes potential contact with live circuits per IEC 60950

The patented SBS® connector family is designed to

provide high power in a compact ergonomic housing with protection against accidental contact with live circuits. This is of particular importance in applications where

DC voltages exceed 30 volts and can be health

Wire-to-wire and wire-to-board configurations both

provide power contacts rated up to 110 amps. The

SBS®75X offers up to 4 mate-last break-first auxiliary power / signal contacts rated up to 20 amps. The SBS®75G features a third first-mate last-break ground or power contact. All contact positions are rated for

- Wire-to-Wire and Wire-to-Board Configurations
 Allows one connector to meet multiple needs
- Ground or Auxiliary Positions Integrated into the One Piece Housing

Meets all connection requirements in one compact connector housing
