## Torque Wrench

Designed for "F" Connectors, these wrenches help prevent over tightening. An audible click tells you the connection has been properly achieved.

These wrenches all have angle heads, sized for $7 / 16$ " F connectors and are designed with an ergonomic cushioned handle for user comfort and protection. The last two digits of the part number indicate the inch pounds of torque (either 20 or 30 inch pounds) and the first four letters indicate whether the head is a speed head or a full head (TWAF is full and TWAS is speed). Note that these wrenches work in tightening mode only. Torque wrenches are 6 1/2" long.

Full Head - is a full size open end wrench that behaves like a traditional open end wrench.

Speed Head - is designed to act like a ratcheting wrench. The tool skips over the corners of the bolt or nut being turned so no repositioning of the tool is required (allowing continuous turning).

| Part No. | Description | Torque <br> in Inch-Pounds | Torque <br> in Newton Meters |
| :--- | :---: | :---: | :---: |
| TWAF-71620 | Torque Wrench Full Head | 20 | 2.26 |
| TWAS-71620 | Torque Wrench Speed Head | 20 | 2.26 |
| TWAF-71630 | Torque Wrench Full Head | 30 | 3.39 |
| TWAS-71630 | Torque Wrench Speed Head | 30 | 3.39 |
