Note: 1. Make sure the thickness of the mounting panel is 0.5 to 3.2 mm .
2. If the panel is to be finished with coating, etc., make sure that the panel meets the specified dimensions after coating.
3. Figures in parentheses are for screw-less clamp connectors.

Models with PCB Terminals

Note: 1. Ensure that the variation in the distance between the centers of neighboring mounting holes is less than $\pm 0.1 \mathrm{~mm}$
2. Make sure the thickness of the mounting panel is 0.5 to 3.2 mm . If, however, a Switch Guard or Dust Cover is used, the thickness of the mounting panel must be 0.5 to 2 mm .
3. If the panel is to be finished with coating, etc., make sure that the panel meets the specified dimensions after coating.
