37563 - REEL STORAGE CONTAINER, OPEN, 7 INCH, 15 SLOTS , 445MM X 210MM X 184MM

Features Technical Information Additional Information

- **In stock - will ship in 3 days or less**
- Dissipative impregnated corrugated material
- Economical method of storing reels
- Reel identification labels included
- Each reel storage box has 15 cells for efficient storage
- Partitions are easily removed to accommodate wider reels
- Reusable, ensuring best value
- **Lead-free RoHS compliant**
- Made in the United States of America

Per Packaging standard ANSI/ESD S541 Annex E.7 Tape and Reel "Devices (parts and components) can be fed to production equipment from carrier tape that is shaped to hold the device. The carrier tape is wound on a reel similar to motion picture film. A cover tape applied to the carrier tape keeps the device on the carrier. Both tape and reel can be made from plastic or paper and derive ESD protective properties from antistat, carbon, or inherently dissipative/conductive materials."
