## 700 SERIES

## Curtis

## DESCRIPTION

The Curtis 700 Series are highly reliable solid state hour meters and counters that offer an unprecedented combination of patented technology, performance, reliability and value.

MODEL 700: 2-Wire Hour Meter, displays only when powered. Available in AC/DC.
MODEL 701: 3-Wire Hour Meter, has a provision or continuous display. Available in $A C / D C$ and DC-only.
MODEL 703: Pulse Counter. Available in AC/DC and DC-only.

## APPLICATIONS

A wide variety of industrial and commercial applications, including scheduled maintenance, warranty and leasing for medical equipment, transport and industrial vehicles and other industrial equipment.

## FEATURES

- All-8's LCD function test: each digit displays an eight for one second after power-up.
- Attractive 6 -digit LCD 5 mm or 7 mm high digits 7 mm with optional backlighting) are much easier to read than electromechanical meters, which have only 3 mm high digits.
- Silent operation - no moving parts. Eliminates annoying gear and motor noise.
- Exceptional reliability due to nonvolatile memory (EEPROM) which retains data for $25+$ years.
- Wide voltage ranges, for example, one unit can be powered from 75 to 270 VAC anywhere between 48 and 440 Hz - ideal for
distribution and worldwide markets without having to stock multiple model types.
- Electrical reset (optional).
- Available in ten case styles - all fit in standard hour meter/counter cutouts.
- Multiple mountings available Metal U-bracket, "U" clamp/stud (D, Q, R and S cases), flange mount with hardware (F, T, G, J cases), or mounting clip (G, L, Y, Z, cases).
- Backlit units allow external illumination control, i.e., on/ off or dimmer (12VDC only).
- Flashing hourglass icon indicates when the hour meter is accumulating time.
- Memory will arm only when power has been applied for five seconds (with no loss of time or counts).
- Low power consumption.
- UL and CE recognized.
