

# **Ulti**Mod

The UltiMod series from Excelsys - the Ultimate range of Modular Configurable Power Supplies

- Unique in Flexibility
- Unrivalled in Performance
- Ultra Cost Competitive

# Unique in Flexibility, Unrivalled in Performance, Ultra Cost Competitive

# **FEATURES & OPTIONS**

- · Dual Safety Approvals
  - UL/EN60950 2nd edition
  - UL/EN60601-1 3rd edition
- Highest Efficiency up to 92%
- User & Field Configurable
- Standard Medical Features
  - Leakage Current <300µA (<150µA optional)
  - 2 MOPP
  - 4KV Isolation
- · Lowest Acoustic Noise
- -40°C Startup Temperature
- · Extra Ruggedised as Standard
  - Shock: >60G's
  - Vibration: MIL STD-810G
- No Minimum Load
- Extra low profile <1U height</li>
- · All outputs fully floating
- Series / Parallel of multiple outputs
- 5V Isolated standby voltage
- · Product Options: Conformal Coating, Low Leakage Current, Connector, Cabling & Mounting options and Reverse Fans

# **TYPICAL APPLICATIONS**

- · Medical; Clinical diagnostic equipment, Medical lasers, Dialysis equipment, Radiological Imaging, Clinical Chemistry
- · Industrial; Test and Measurement, Industrial Machines, Automation equipment, Printing, Telecommunications, Audio equipment

The UltiMod Series from Excelsys - the Ultimate range of Modular Configurable Power Supplies provides up to 1200W output power in a compact 1U form factor. The series is designed for highest efficiencies and consists of two Input AC front ends (powerPacs), UX4 and UX6 and 11 DC output powerMods (XgA to XgL).

Both powerPacs carry dual safety certification, EN60950 for Industrial Applications and EN60601-1 3rd Edition for Medical Applications. The UX4 delivers up to 600W and can be populated with up to 4 powerMods, the UX6 delivers up to 1200W and can be populated with up to 6 powerMods.

The powerMods provide up to 12 fully isolated DC outputs ranging from 1.0V to 58V. Users can select the modules most suitable for their application based on power level and/or desired control feature set. The series provides unique levels of flexibility and is completely user field configurable. Customers can configure any combination of powerMods in series/parallel. This unique flexibility combined with our Industry leading 5 Year Warranty minimises the total cost of ownership for our customers.

The UltiMod Series of modular configurable power supplies provides global leadership in product reliability, efficiency and cost effectiveness.

# **Output Connectors**

The output powerMods connection details are shown below. Type A connectors are for single output powerMods XgA to XgL. The Type B connector is for the Dual output XgF powerMod. The power and signal connectors are as follows:

Type A: powerMods XgA to XgE XgG to XgL

Type B: powerMod XgF

## **Output Signals and Power Connector Pinout**

Pin	J3	J3	J3	J3	J4	J4
Module	(XgA to XgD)	(XgG to XgL)	(XgE)	(XgF)	(Type A)	(Type B)
1	not used	+Sense	not used	-pg (V2)	-Vout	-V2
2	Common	-Sense	not used	+pg (V2)	+Vout	+V2
3	not used	Vtrim	not used	Inhibit V2)		-V1
4	not used	Itrim	Common	Common (V2)		+V1
5	+Inhibit	+Inhibit/Enable	-pg	-pg (V1)		
6	-Inhibit	-Inhibit/Enable	+pg	+pg (V1)		
7	not used	+pg	Inhibit	Inhibit (V1)		
8	not used	-pg	Common	Common (V1)		

# **Output Mating Connectors**

J3: Locking Molex 51110-0860; Non Locking Molex 51110-0850; Crimp Terminal: Molex p/n 50394.

J4: M4 Screw

## **Series Connection**

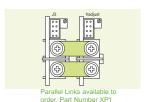

To achieve increased output voltages, simply series outputs using standard series links, paying attention to the requirements to maintain SELV levels if required in your system.

# Parallel Connection for powerMods XgA to XgL

To achieve increased current capacity, simply parallel outputs using the standard parallel links. Excelsys 'wireless' sharing ensures that current hogging is not possible. To parallel connect outputs:

- 1. Switch on IShare switch to ON for powerMods XgG XgL or add jumper to current share header LK1 for powerMods XgA-XgD.
- 2. Connect Negative Parallel Link.
- 3. Adjust output voltages of powerMods to within 5mV of each other.
- 4. Connect Positive Parallel Link.

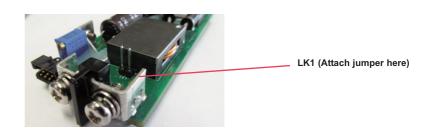

DIP Switch for Current Share & Inhibit/Enable for powerMods XgG to XgL

# Dip Switch settings above are:

Current Share: OFF Inhibit ON: Normally ON

### LK1 for Current Share on powerMods XgA to XgD

Recommended Jumper for LK1: HARWIN M7567-05 (Jumper Socket, Black, 2.54mm, 2-way)

# DIP Switch Option for XgG to XgL

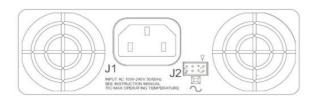

powerMods can be configured to be normally ON or normally OFF by appropriate setting of the DIP switch on the powerMod. (default mode is normally ON). The powerMod will deliver output voltage when mains is applied (and the powerPac is enabled). The powerMod requires an external 5V signal (between +IN/EN and -IN/EN) to disable the output pins. This may be reversed by setting of the dip switch to the OFF position.

#### **Input Connectors**

The UltiMod series has a variety of input connector options to ease system integration. These include IEC, Input cables (3-wire) and IEC to Screw Terminal Adaptor.

Pin	J1	J2	
_ 1	Line	Common	
2	Neutral	+5V Bias	
3	Earth	not used	
4		AC Fail	
5		Fan Fail	
6		Global Enable	
7		Temp Alarm	
8		Global Inhibit	

#### **Input Mating Connectors**

J1: IEC320 type female plug rated 13, Locking IEC cable and connector: Schaffner EMC part number IL13-US1-SVT-3100-183.

J2: Locking Molex 51110-0850; Non Locking 51110-0860; Crimp Terminal: Molex p/n 50394

## Input Cable (Option D)

The UltiMod Series is also available with an input cable connection option allowing greater flexibility when mounting the UltiMod in the system. Input cables are 300mm in length and come supplied with Faston connectors.

#### **IEC to Screw Terminal Adaptor**

Some applications may require a screw terminal input rather than the standard IEC320 connector provided with the UltiMod. For such applications, Excelsys can offer the XE1, the IEC to Screw terminal adaptor accessory plug. This is a press fit connector that plugs securely into the UltiMod *powerPac* and provides the system integrator with screw terminals for mains connection.

## **UltiMod Mounting Options**

To ease system integration there are three methods of mounting the Ultimod in a system.

## 1. Base Plate Mounting

The unit can be mounted in the system via the mounting holes present on the base. See mechanical drawings for mounting hole positions. Use M4 mounting screws. Ensure that maximum screw penetration from base does not exceed 6mm.

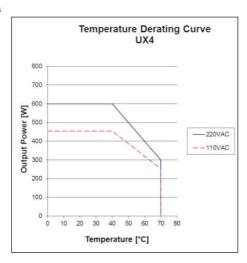

## 2. Fleximount - side mounting clip

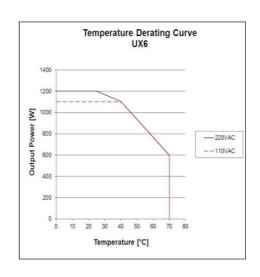

Using the side mounting clips accessory shown. The clip can be positioned at the user defined position along the slide rail on the side of the UltiMod. The clip is then mounted to the system base plate. Use M4 mounting screws to fix mounting clip to system base. Excelsys part number Z165.

# 3. Fleximount - self clenching studs

Using the slide rail on side of the Ultimod, self clenching studs can be placed at a user defined position. Recommend: PEM FH-M4-X or FH-832-X or equivalent.

# UX4: 4 Slot UltiMod powerpac

#### UX6: 6 Slot UltiMod powerpac

## Configuring your UltiMod

## Configuration Example 1: UX4CGD0-D4 contains;

UX4 powerPac: 600W 4-slot chassis, Standard module settings:

Slot 1: XgC: 36V/5.6A Slot 2: XgG: 2.5V/40A Slot 3: XgD: 48V/4.2A

Slot 4: Empty

Option D: Input cable option; Option 4: 150µA leakage current option.

# Configuration Example 2: UX4CGD0PD4B contains;

UX4 powerPac: 600W 4-slot chassis, Factory preset module settings:

Slot 1: XgC: 32V/5.6A XgC output voltage factory adjusted to 32V

Slot 2: XgG: 2.5V/40A

Slot 3: XgD: 46V/4.2A XgD output voltage factory adjusted to 46V

Slot 4: Empty

Option D: Input cable option; Option 4: 150µA leakage current option; B: Factory assigned unique identifier.

## Configuration Example 3: UX6BBDDA0C02A contains;

UX6 powerPac: 1200W 6-slot chassis, Factory preset module settings:

Slot 1: XgB: 24V/8.3A (set in parallel with Slot 2)

Slot 2: XgB: 24V/8.3A (set in parallel with Slot 1)

Slot 3: XgD: 46V/4.2A XgD output voltage factory adjusted to 46V

Slot 4: XgD: 48V/4.2A

Slot 5: XgA: 12V/12.5A

Slot 6: Empty

Option C: Conformal Coated; Option 2: Reverse Fan; B: Factory assigned unique identifier.

# Configure your UltiMod using our Online Configurator

Our Sales and Applications teams will be delighted to assist you in defining the best power supply for your application. You can also use our online configurator available at http://www.excelsys.com/xgen configurator/configure.html.
