E3T

CSM_E3T_DS_E_6_1

New Retro-reflective Sensors Added to the Series. Further Contributions to Equipment Downsizing.

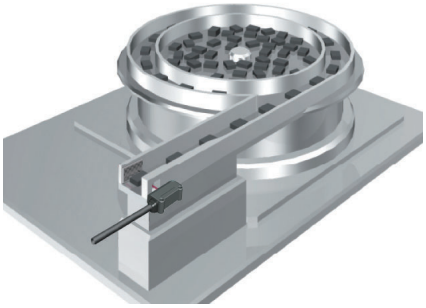
- Coaxial Retro-reflective for reliable positioning applications.
- Series now includes BGS* reflective model with black/white error of 15%
- Easy optical axis adjustment with emitter axis accuracy of ±2° (Through-beam Model)
- Noise and external light resistance enhanced to that of E3Z or equivalent
- Output reverse polarity protection provides reliable support against incorrect wiring.
- The Series includes models with M12 Smartclick pre-wired connectors (-M1TJ) Smartclick

* BGS (Background Suppression) technology prevents detecting background objects.

⚠ Be sure to read *Safety Precautions* on page 14.

Features

E3T-SR4□ NEW : Retro-reflective Sensor with Enhanced Compactness and High Performance

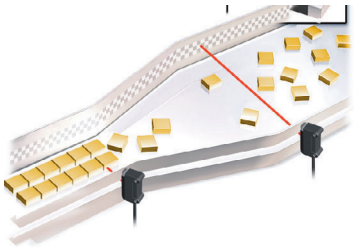


- Perform detection from a small hole.

With a coaxial optical system, the lens diameter is only 2 mm.
Sufficient incident light is obtained even through a small hole.
The Coaxial Retro-reflective Sensor can be used for reliable application with positioning.

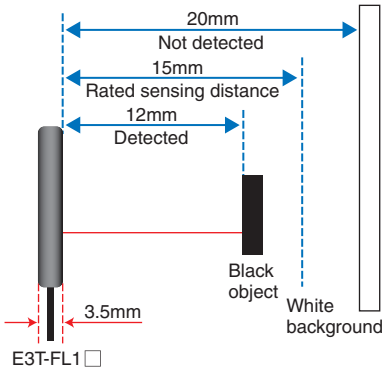
- Improved Stability of Short-distance Detection

A detection distance as short as 10 mm can be used with a Tape Reflector.
Detection is stable through a hole whether the distance is 10 mm or 100 mm (except in combination with the E39-R4).

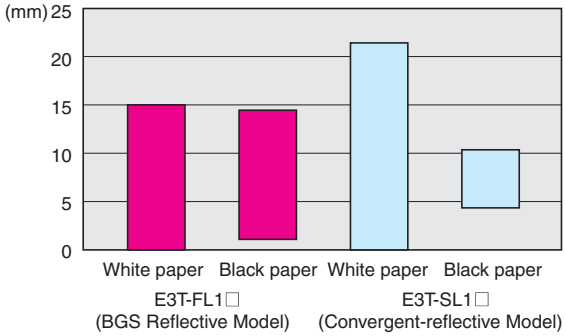


E3T-FL1□/-FL2□: The Slimmest BGS (Background Suppression) Reflective Photoelectric Sensors in the World

Ultra slim at 3.5 mm and black/white error of only 15%.
For example, the E3T-FL1□ can stably detect a black object at 12 mm without being affected by a white background at 20 mm.
OMRON provides BGS performance sharper than the previous Convergent-reflective Sensors.



Dramatic Improvement in Black/White Error



Ordering Information

Sensors (Refer to *Dimensions* on page 15.)

*1. Values in parentheses indicate the minimum required distance between the Sensor and Reflector.
*2. The model number of the Emitter is expressed by adding an "L" to the set model number in the table. Example: E3T-ST11-L 2M
The model number of the receiver is expressed by adding a "D" to the set model number in the table. Example: E3T-ST11-D 2M
Orders for individual Emitters and Receivers are accepted. (Modifications are required for some models.)
*3. Ask your OMRON representative about the previous Retro-reflective Sensors: E3T-SR2□ and E3T-SR3□.
*4. Models are available either with or without the E39-R37-CA Reflector included.
Model with E39-R37-CA Reflector: E3T-SR4□-S
Model without Reflector: E3T-SR4□-C

Variety of Connection Specifications

The models with the connection specifications marked with a black circle in the table are available. The model number indication is a combination of the basic model and the connection specification.

Example: E3T-ST11-M1TJ 0.3M

Basic model number: E3T-ST11

Connection specification: M1TJ 0.3M

NPN Output

Accessories (Order Separately)

Slits (Refer to *Dimensions* on page 18.)

Slit width	Sensing distance (typical) (Sensor model)	Minimum detectable object (typical)	Model	Quantity	Remarks
0.5-mm dia.	100 mm (E3T-ST1□)	0.5-mm dia.	E39-S63	One each for Emitter and Receiver; common with Slit widths of 1 dia. and 0.5 dia. (total of 2)	Plug-in type round slits Can be used with E3T-ST□□ Through-beam Models.
	30 mm (E3T-ST2□)				
1-mm dia.	300 mm (E3T-ST1□)	1-mm dia.			
	100 mm (E3T-ST2□)				
0.5-mm dia.	50 mm (E3T-FT1□)	0.5-mm dia.	E39-S64		Plug-in type round slits Can be used with E3T-FT□□ Through-beam Models.
	30 mm (E3T-FT2□)				
1-mm dia.	100 mm (E3T-FT1□)	1-mm dia.			
	50 mm (E3T-FT2□)				

Reflectors (Refer to *Dimensions* on page 17.)

Name	Recommended Sensor	Sensing distance	Minimum detectable object	Model	Quantity	Remarks
Small Reflectors	E3T-SR4□	200 mm (30 mm) *1	2-mm dia.	E39-R4	1	Provided with the E3T-SR4□
	E3T-SR4□-S	100 mm (10 mm) *1		E39-R37-CA *2		Provided with the E3T-SR4□-S
Tape Reflectors	E3T-SR4□-C	100 mm (10 mm) *1		E39-RS1-CA *2		Use Tape Reflectors in combination with the E3T-SR4□-C, which does not come with a Reflector.
				E39-RS2-CA *2		
				E39-RS3-CA *2		

*1. Values in parentheses indicate the minimum required distance between the Sensor and Reflector.
*2. The E3T-SR4□ cannot be used with the E39-R37 or E39-RS1/2/3 (without CA) Tape Reflectors.
The E39-□-CA Reflector is for use only with the E3T-SR4□. It cannot be used with other Sensors.

Sensitivity Adjustment Unit (Refer to *Dimensions* on page 18.)

Appearance	Sensing distance (typical)	Model	Quantity	Remarks
	300 to 800 mm	E39-E10	1	Can be used with the E3T-ST1□ Through-beam Models.

Mounting Brackets (Refer to *Dimensions* on page 18.)

Appearance	Model	Quantity	Remarks
	E39-L116	1	Can be used with the E3T-S□□□ Side-view Models. (A securing nut plate is provided with the Mounting Bracket.)
	E39-L117		
	E39-L118		
	E39-L119		Can be used with the E3T-F□□□ Flat Models.
	E39-L120		

Note: When using Through-beam models, order one bracket for the Receiver and one for the Emitter.

Sensor I/O Connectors (For M12, refer to *XS5*. For e-CON, contact your OMRON representative.)

Size	Cable	Appearance	Cable type		Model
M12 (For -M1TJ models)	Standard	Straight	2 m	4-wire	XS5F-D421-D80-A
			5 m		XS5F-D421-G80-A
e-CON	Standard cable	Connector on one end	2 m	4-wire	E39-ECON2M
			5 m		E39-ECON5M
		Connector on both ends	0.5 to 1 m		E39-ECONW□M Replace □ with the cable length in 0.1-m increments.
			1.1 to 1.5 m		
			1.6 to 2 m		

Note: When using Through-beam models, order one connector for the Receiver and one for the Emitter.

Safety Precautions

Refer to *Warranty and Limitations of Liability.*

⚠ WARNING

This product is not designed or rated for ensuring safety of persons. Do not use it for such purpose.

Do not apply AC power to the E3T, otherwise the E3T may rupture.

Precautions for Correct Use

Do not use the product in atmospheres or environments that exceed product ratings.

● Wiring

The maximum power supply voltage is 24 VDC +10%. Before turning the power ON, make sure that the power supply voltage is not more than maximum voltage.

Load short-circuit protection

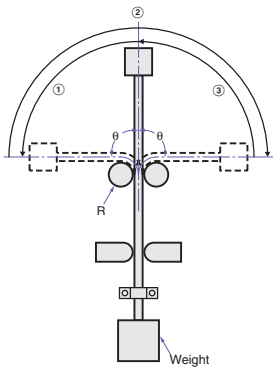
The E3T incorporates a load short-circuit protection function. If the load short-circuits, the output of the E3T will be turned OFF. Then, recheck the wiring and turn on the E3T again to reset the load short-circuit protection function. The load short-circuit protection function will work if there is a current flow that is 1.5 times larger than the rated load current. When using a capacitance load, be sure that the inrush current will not exceed 1.5 times larger than the rated current.

● Mounting

When mounting the Sensor, never strike it with a heavy object, such as a hammer. Doing so may reduce its watertight properties. Use M2 screws and flat or spring washers to secure the Sensor. (Tightening torque: 0.15 N·m max.)

Mounting the Sensor on Moving Parts

Consider models that use break resistant cables (e.g., Robotics Cables) if the Sensor will be mounted on a moving part, such as a robot hand. The flexing resistance of Robotics Cable at approximately 400 thousand times is far superior to that of standard cable at approximately 14 thousand times.



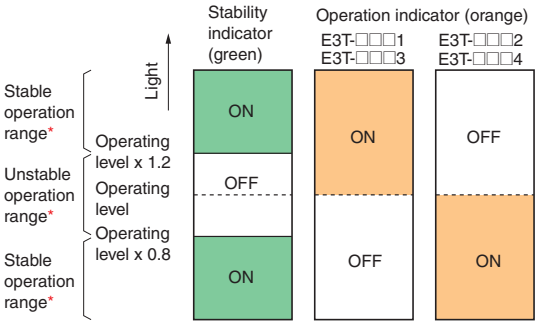
Cable Bending Rupture Test (Tough Cable Breaking Test)
The cable is repeatedly bent with power supplied to check the number of bends until the current is turned OFF.

Test	Specimen	Standard cable 2.4-mm dia. (7/0.127-mm dia.), 3 conductors	Robotics cable 2.4-mm dia. (20/0.08-mm dia.), 3 conductors
Con-tents/ condi-tions	Bending angle (θ)	90° each to the left and right	
	Bending speed	50 times/min	
	Load	200 g	
	Operation per bend	Once in 1 to 3 in the diagram	
	Curvature radius of support point (R)	5 mm	
Result		Approx. 14,000 times	Approx. 400,000 times

● Adjusting

Indicators

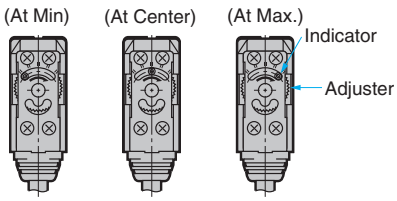
- The following graphs indicate the status of each operating level.
- Be sure to use the E3T within the stable operating range.



*If the E3T fs operating level is set to the stable operation range, the E3T will be in most reliable operation without being influenced by temperature change, voltage fluctuation, dust, or setting change. If the operating level cannot be set to the stable operation range, pay attention to environmental changes while operating the E3T.

Use of E39-E10 Sensitivity Adjustment Unit

(Dark-ON: E3T-ST12)



1. Mount the Unit on the Receiver.
2. Set the adjuster of the Sensitivity Adjustment Unit to Max. (Before shipping: Max.)
3. After mounting on the Sensor, adjust the optical axis and secure the Sensor.
4. Place a workpiece between the Emitter and Receiver and gradually turn the adjuster counterclockwise toward the Min. side. Stop turning the adjuster when the operation indicator and stability indicator (green) turn ON.
5. Remove the workpiece and confirm that the operation indicator is OFF and the stability indicator (green) is ON. This completes the adjustment.

Note: If the light attenuation rate due to a workpiece is 40% or less, the stability indicator will not turn ON whether or not light is received. When the variation of light is small such as when sensing semi-transparent workpieces, carefully perform preliminary testing.

● Others

Do not install the E3T in the following locations.

- Locations subject to excessive dust or dirt
- Locations subject to direct sunlight
- Locations subject to corrosive gas
- Locations subject to contact with organic solvents
- Locations subject to vibration and shock
- Locations subject to contact with water, oil, or chemicals
- Locations subject to high humidities that might result in condensation

Dimensions

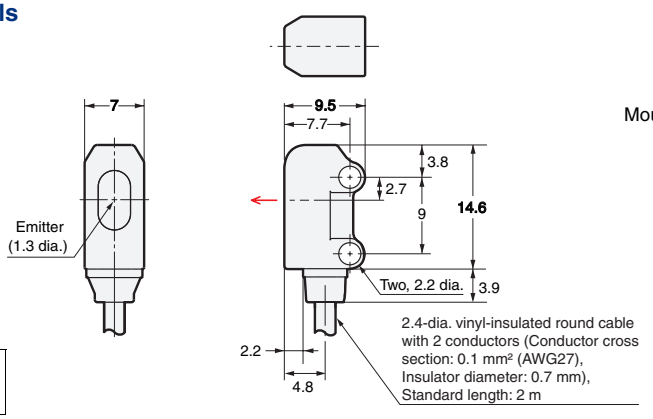
(Unit: mm)
Tolerance class IT16 applies to dimensions in this datasheet unless otherwise specified.

Sensors

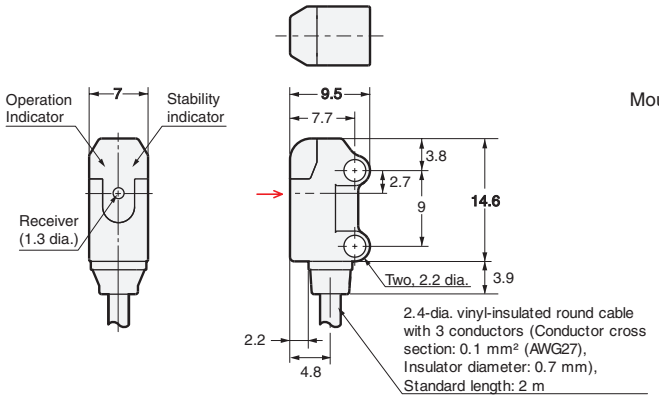
Through-beam Models (Side-view)

E3T-ST1□ (Emitter)
E3T-ST2□ (Emitter)

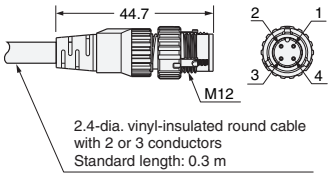
Emitter: E3T-ST□□-L
Receiver: E3T-ST□□-D



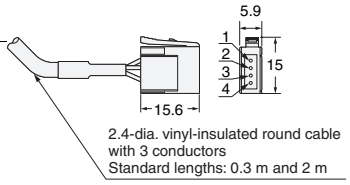
E3T-ST1□ (Receiver)
E3T-ST2□ (Receiver)



M12 Smartclick Pre-wired Connector Model (E3T-ST□□-M1TJ)



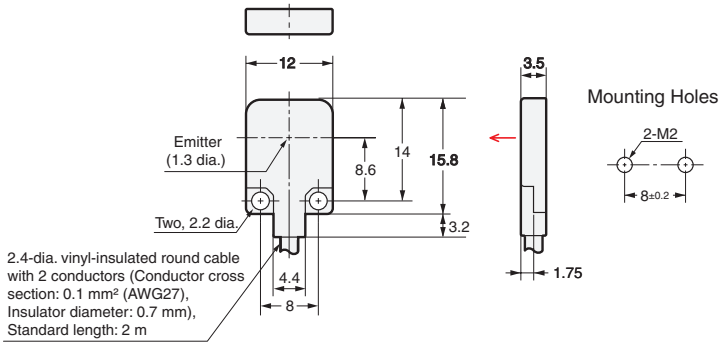
e-CON Pre-wired Connector Model (E3T-ST□□-ECON)



Through-beam Models (Flat)

E3T-FT1□ (Emitter)
E3T-FT2□ (Emitter)

Emitter: E3T-FT□□-L
Receiver: E3T-FT□□-D



Terminal No.	Specifications
1	+V

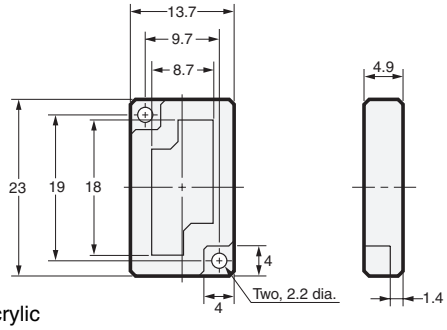
Accessories

Reflector (Provided with E3T-SR4□)

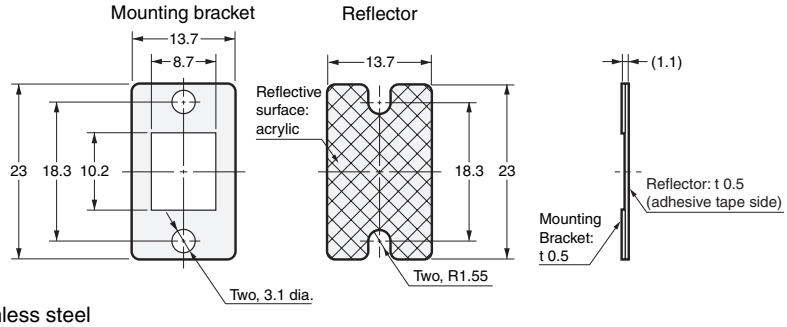
E39-R4



Material, reflective surface: acrylic
Rear surface: ABS

Reflector (Provided with E3T-SR4□-S)

E39-R37-CA

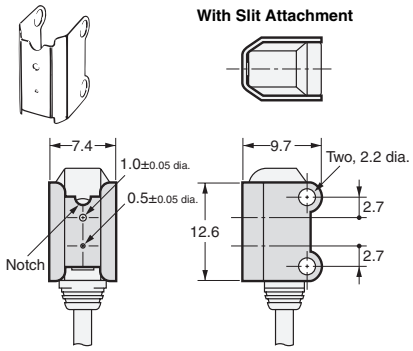


Material: Mounting plate: stainless steel (SUS301)
Reflective surface: acrylic

Note: The reflective plate and mounting plate (1) come as a set.

Accessories (Order Separately)

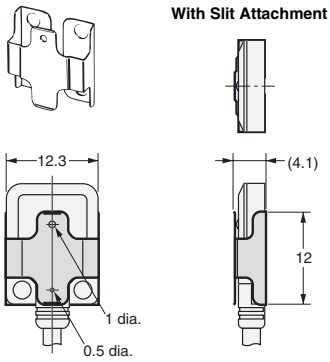
Slit for E3T-ST□□ Through-beam Models
E39-S63



Material: 0.2-mm thick stainless steel (SUS301)

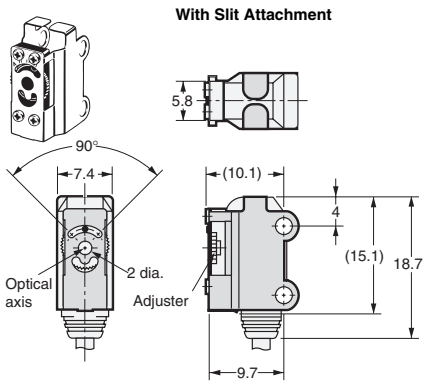
Note: Align the notch direction of the Slit when installing on the Emitter and Receiver.

Slit for E3T-FT□□ Through-beam Models
E39-S64



Material: 0.1-mm-thick stainless steel (SUS301)

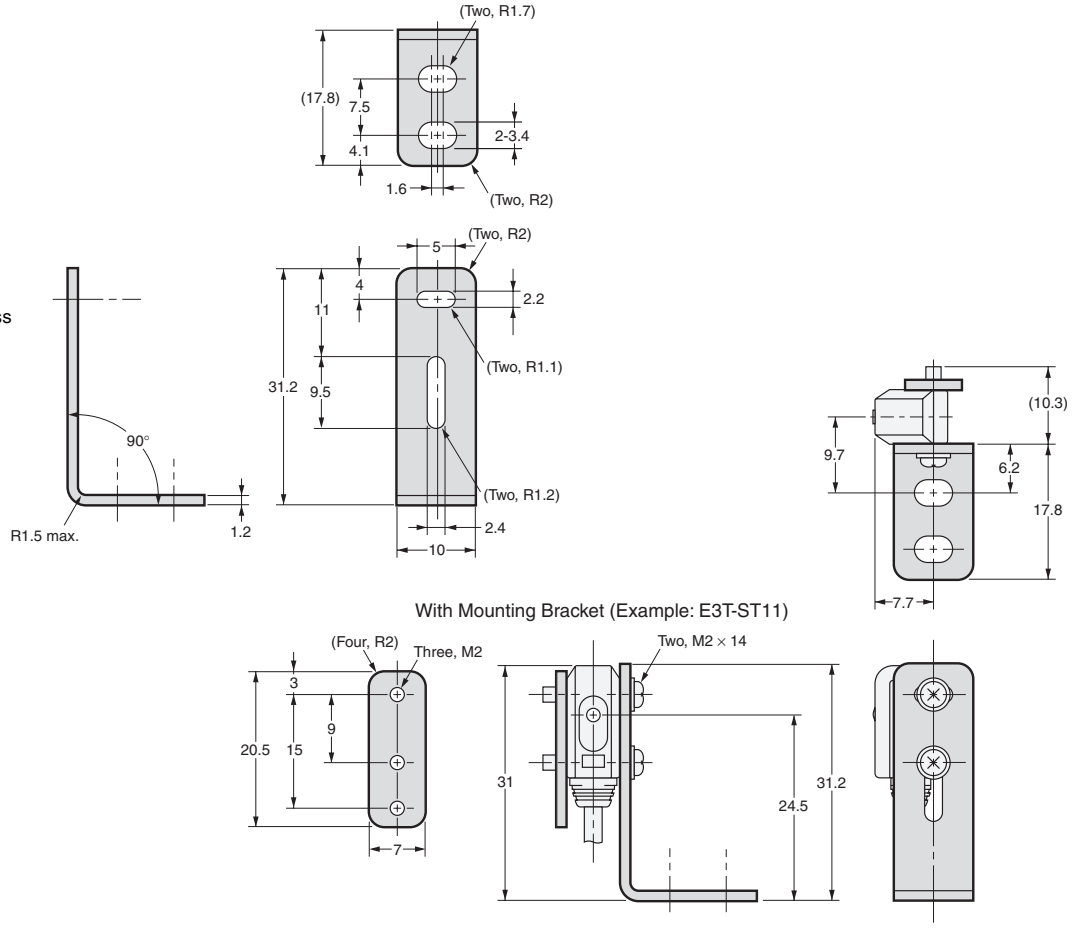
Sensitivity Adjustment Unit (for E3T-ST1□ Through-beam Models)
E39-E10



Material: stainless steel (SUS301)

Mounting Brackets for Side-view Models
E39-L116

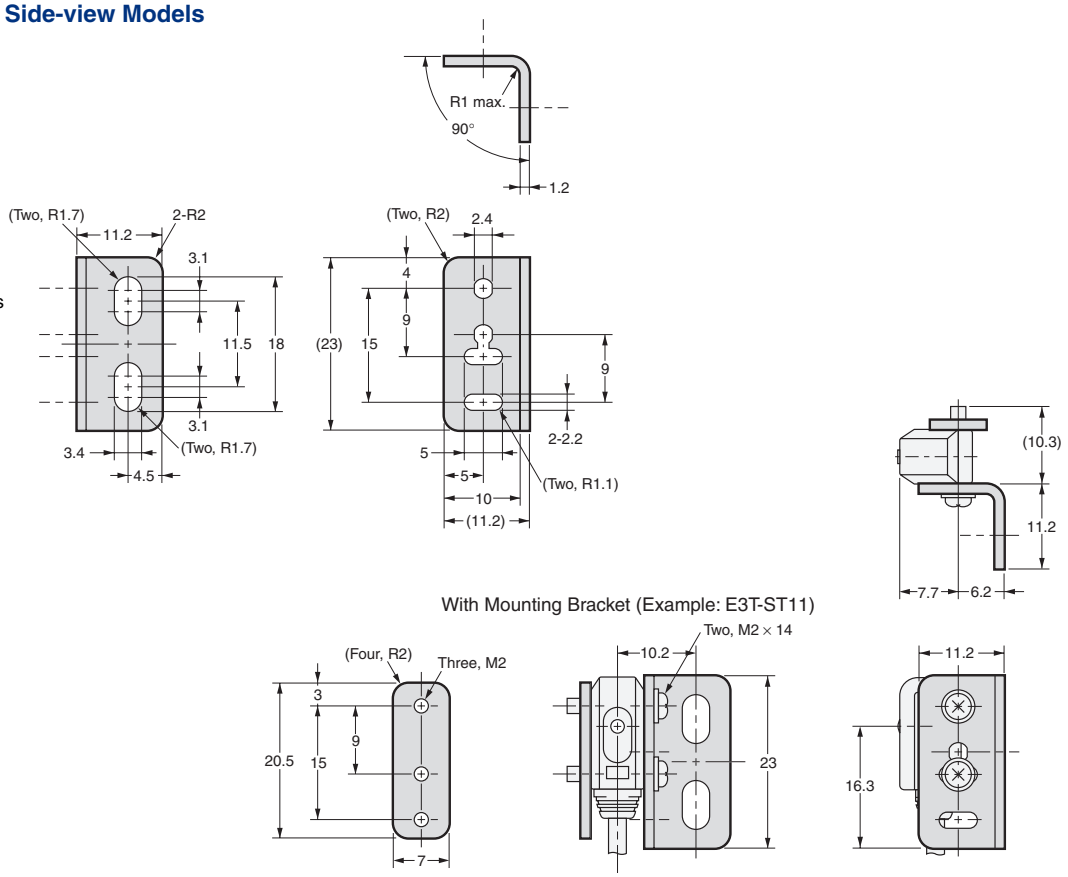
Material: 1.2-mm-thick stainless steel (SUS304)



Mounting Brackets for Side-view Models

E39-L117

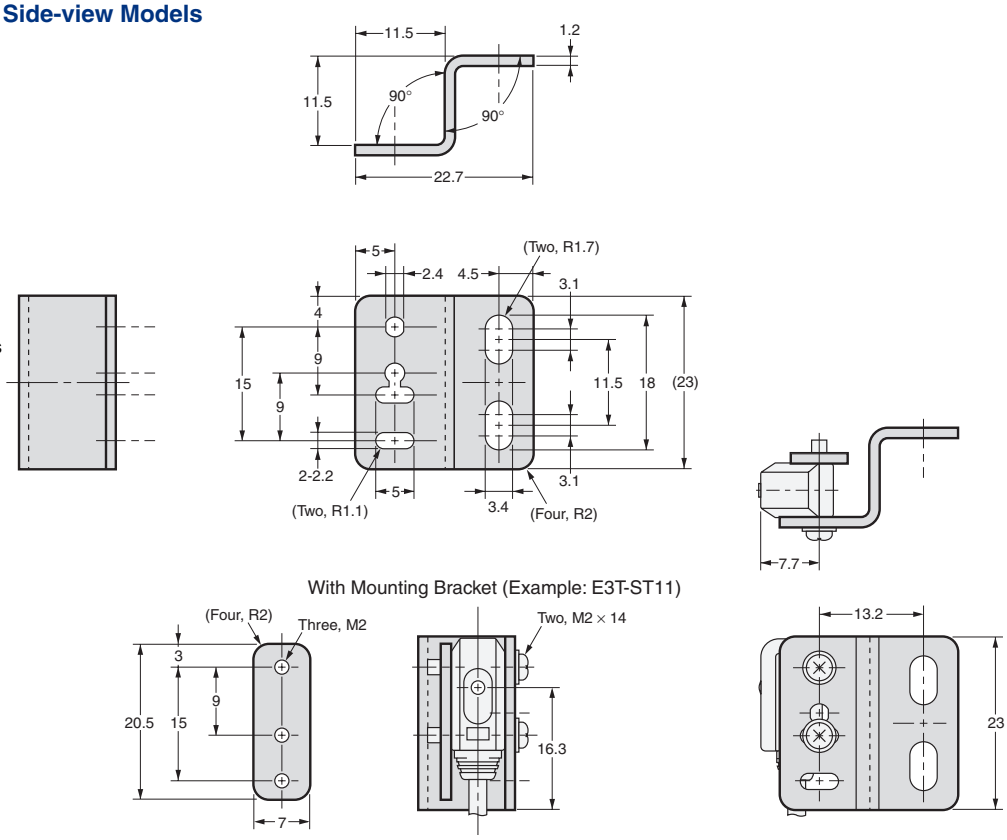
Material: 1.2-mm-thick stainless steel (SUS304)



Mounting Brackets for Side-view Models

E39-L118

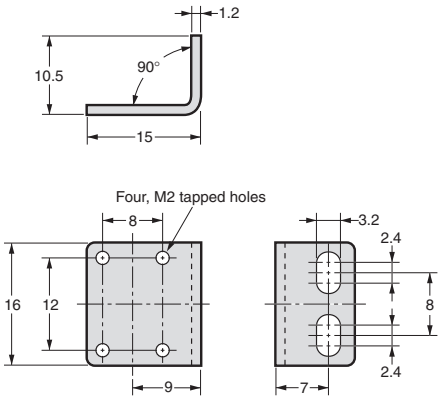
Material: 1.2-mm-thick stainless steel (SUS304)



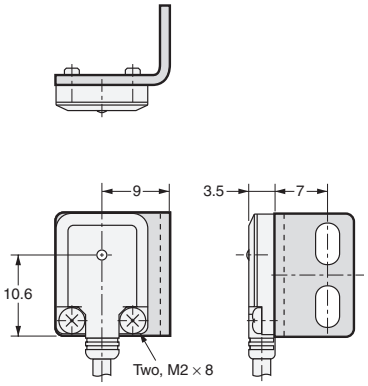
Mounting Brackets for Flat Models

E39-L119

Material: 1.2-mm-thick stainless steel (SUS304)



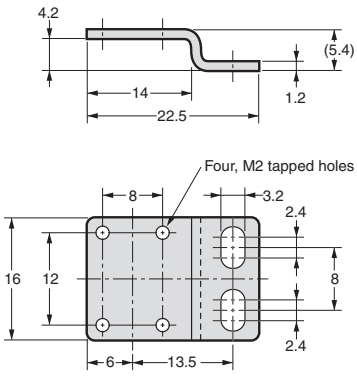
With Mounting Bracket
(Example: E3T-FT11)



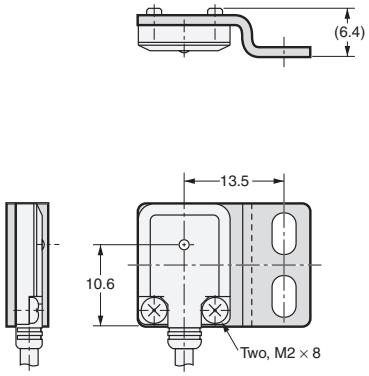
Mounting Brackets for Flat Models

E39-L120

Material: 1.2-mm-thick stainless steel (SUS304)



With Mounting Bracket
(Example: E3T-FT11)



Read and Understand This Catalog

Please read and understand this catalog before purchasing the products. Please consult your OMRON representative if you have any questions or comments.

Warranty and Limitations of Liability

WARRANTY

OMRON's exclusive warranty is that the products are free from defects in materials and workmanship for a period of one year (or other period if specified) from date of sale by OMRON.

OMRON MAKES NO WARRANTY OR REPRESENTATION, EXPRESS OR IMPLIED, REGARDING NON-INFRINGEMENT, MERCHANTABILITY, OR FITNESS FOR PARTICULAR PURPOSE OF THE PRODUCTS. ANY BUYER OR USER ACKNOWLEDGES THAT THE BUYER OR USER ALONE HAS DETERMINED THAT THE PRODUCTS WILL SUITABLY MEET THE REQUIREMENTS OF THEIR INTENDED USE. OMRON DISCLAIMS ALL OTHER WARRANTIES, EXPRESS OR IMPLIED.

LIMITATIONS OF LIABILITY

OMRON SHALL NOT BE RESPONSIBLE FOR SPECIAL, INDIRECT, OR CONSEQUENTIAL DAMAGES, LOSS OF PROFITS OR COMMERCIAL LOSS IN ANY WAY CONNECTED WITH THE PRODUCTS, WHETHER SUCH CLAIM IS BASED ON CONTRACT, WARRANTY, NEGLIGENCE, OR STRICT LIABILITY.

In no event shall the responsibility of OMRON for any act exceed the individual price of the product on which liability is asserted.

IN NO EVENT SHALL OMRON BE RESPONSIBLE FOR WARRANTY, REPAIR, OR OTHER CLAIMS REGARDING THE PRODUCTS UNLESS OMRON'S ANALYSIS CONFIRMS THAT THE PRODUCTS WERE PROPERLY HANDLED, STORED, INSTALLED, AND MAINTAINED AND NOT SUBJECT TO CONTAMINATION, ABUSE, MISUSE, OR INAPPROPRIATE MODIFICATION OR REPAIR.

Application Considerations

SUITABILITY FOR USE

OMRON shall not be responsible for conformity with any standards, codes, or regulations that apply to the combination of products in the customer's application or use of the products.

At the customer's request, OMRON will provide applicable third party certification documents identifying ratings and limitations of use that apply to the products. This information by itself is not sufficient for a complete determination of the suitability of the products in combination with the end product, machine, system, or other application or use.

The following are some examples of applications for which particular attention must be given. This is not intended to be an exhaustive list of all possible uses of the products, nor is it intended to imply that the uses listed may be suitable for the products:

- Outdoor use, uses involving potential chemical contamination or electrical interference, or conditions or uses not described in this catalog.
- Nuclear energy control systems, combustion systems, railroad systems, aviation systems, medical equipment, amusement machines, vehicles, safety equipment, and installations subject to separate industry or government regulations.
- Systems, machines, and equipment that could present a risk to life or property.

Please know and observe all prohibitions of use applicable to the products.

NEVER USE THE PRODUCTS FOR AN APPLICATION INVOLVING SERIOUS RISK TO LIFE OR PROPERTY WITHOUT ENSURING THAT THE SYSTEM AS A WHOLE HAS BEEN DESIGNED TO ADDRESS THE RISKS, AND THAT THE OMRON PRODUCTS ARE PROPERLY RATED AND INSTALLED FOR THE INTENDED USE WITHIN THE OVERALL EQUIPMENT OR SYSTEM.

PROGRAMMABLE PRODUCTS

OMRON shall not be responsible for the user's programming of a programmable product, or any consequence thereof.

Disclaimers

CHANGE IN SPECIFICATIONS

Product specifications and accessories may be changed at any time based on improvements and other reasons.

It is our practice to change model numbers when published ratings or features are changed, or when significant construction changes are made. However, some specifications of the products may be changed without any notice. When in doubt, special model numbers may be assigned to fix or establish key specifications for your application on your request. Please consult with your OMRON representative at any time to confirm actual specifications of purchased products.

DIMENSIONS AND WEIGHTS

Dimensions and weights are nominal and are not to be used for manufacturing purposes, even when tolerances are shown.

PERFORMANCE DATA

Performance data given in this catalog is provided as a guide for the user in determining suitability and does not constitute a warranty. It may represent the result of OMRON's test conditions, and the users must correlate it to actual application requirements. Actual performance is subject to the OMRON Warranty and Limitations of Liability.

ERRORS AND OMISSIONS

The information in this document has been carefully checked and is believed to be accurate; however, no responsibility is assumed for clerical, typographical, or proofreading errors, or omissions.

2009.5

In the interest of product improvement, specifications are subject to change without notice.
