TECHNICAL INFORMATION

HOW TO ORDER

Description

Series 300-J jumper combs are designed for use with series 300 terminal strips, and allow electrical connection between adjacent poles. Jumper combs are secured in the terminal strip by the wire clamping screws, the exposed portion of the jumper is insulated to prevent accidental shock or short circuiting.

For electrical connection between adjacent poles

For use with 323 /-FN /-FU /-V and HDS versions

Technical Data

Center to Center Spacing: 10.000 mm (0.394 in)

2 to 12 poles
