RS Pro Combination Pliers

RS Stock No: **540-2007**

Product Details

RS Pro combination pliers provides a repeatable method of producing bends in component leads for strain relief. The bend also gives component standoff for components that are temperature sensitive. The special cutting and forming pliers has substantial pressed steel frames, chemically blackened, with return springs and plastic grips for easy, comfortable handling. Cutting edges are ground to give precise cropping and manipulation of component leads. Tip is angled for easy access on to boards.

Features and Benefits

- Produces bend in component leads for strain relief
- Temperature sensitive
- Return springs and plastic grips for easy and comfortable handling
- Tips are angled for easy access on to boards
