

Features

- System Board for Emerson DeltaV
- For one 32-channel DI card via 40-pin Mass Termination Block
- For 4 modules/16 channels
- Recommended module: HiD2844 (DI)
- Volt-free fault indication output
- 24 V DC supply, reverse polarity protected, optional daisychainable
- Hazardous area: screw terminals, blue
- Safe area: IDC connector, 20-pin

Function

The function of the Termination Board as well as the connector pin assignment exactly fit the requirement of DeltaV Traditional I/O systems.

Information about line fault detection of the interface modules is available for the system as volt-free contact.

The Termination Boards are supplied with a robust plastic housing as standard. This design permits the fast and reliable installation on 35 mm DIN mounting rail acc. to EN 60715 in the cabinet.

Application

For detailed listing of connectable cards see application section.
