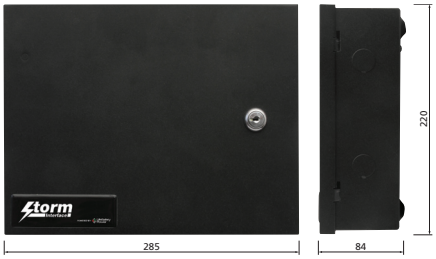
INDUSTRIAL

Constructed to survive in exposed, outdoor or unsupervised environments these systems combine the field proven durability of the StrikeMaster keypad with a separate, remotely secured electronic control module. The control module along with a dedicated high spec power supply is contained within a tamper alarmed steel enclosure. This enclosure is located within the secured building, protected from criminal attempts to breach or disable building security systems.

The control module supports both IN and OUT functionality of either one or two keypads (one or two doors).

Available in vandal resistant or robust illuminated versions.

- Certified to US standard UL294
- Controller with power supply in a secure, tamper alarmed enclosure.
- Battery management / back-up facility (battery not supplied) provides up to 8 hours of operation during power failure.
- Vandal resistant, IP65 rated, secure keypad.
- Additional keypads also available.
- Audible and visual confirmation of code acceptance and code denied (at the keypad).



All dimensions in mm

- Up to 100 programmable user codes can be stored for each keypad.
- 4, 5 and 6 digit PINs can be programmed.
- Door latched or door locked mode.
- Door forced alarm feature.
- Entry under duress alarm feature.
- Door sensor feature.
- Door bell feature with unique tone for each door.
- Software based tamper detection / alarm feature.
- Anti tamper switch on keypad to detect removal from back box.
- Back box suitable for surface fixing.
- Back box also suitable for fixing to UK, USA and European format flush mount electrical wall boxes (not supplied).
