

Waterproof Machine Task Light with Integrated Ballast

Model: 7700
With Integrated
Ballast

These rugged, all metal construction, waterproof machine task lights provide excellent illumination in touch and wet locations.

Engineered to deliver intensified, bright white Halogen light to meet the needs of demanding shop environments, they feature safe, low voltage, 55w/12v power.

Model: 7701
With Remote Ballast

These light meets the rigorous standards of UL listing and NEMA Type 4 certification (hose down, icing and gaskets application), which make them ideal for CNC and EDM wet location machinery, lathes, milling, metal-working and tool manufacturing.

Added safety features include a rubber boot switch, sealed from liquids, a 9 ft grounded, oil and water resistant SJTO cord with 3-prong plug, and integrated transformer housed in a liquid tight precision cast zinc base housing.

Model: 7702
12 Volt
