

RF Remote Control for Windows 7 & Vista

MODEL NUMBER: ER-V2

Description

The RF Remote for Windows 7 & Vista is a sleek and powerful RF remote control designed specifically for use with Windows 7 & Vista's Media Center multimedia software. It provides more range, convenience and flexibility than infrared remotes.

Features

- Range: The RF Remote for Windows Vista provides a range of up to 90 ft (about three times the distance of infrared remotes).
- Convenience: Unlike an infrared remote, this RF remote does not require line of sight to the RF
 receiver. This allows you to manage Media Center from more areas within the room or even from other
 areas of your house.
- Flexibility: Since the RF signal works through walls and furniture, you have more flexibility in locating the
 PC that will be used to run Media Center. For example, you can place the PC inside an entertainment
 center cabinet or within an AV closet and still easily control Media Center with the remote.

Highlights

- Controls Media Center in Windows Vista and Windows 7
- Works through walls and furniture
- For Windows 7 & Vista Home
 Premium and Vista Ultimate

System Requirements Windows:

- An available USB port
- Windows 7 Home Premium or Ultimate (64-bit) & Windows
 Vista Home Premium or Windows Vista Ultimate (32bit or 64bit)
- TV tuner card with FM radio capability required for live TV

and radio functionality
This remote control is designed
specifically for use with Windows
Vista Media Center.
