

FEATURES:

Ergoclean plastic encapsulated metal wrist straps are the only patented (Patent No. 7,609,503) size adjustable bands of their kind in the world today. The inner surface is made from jewelry grade stainless steel, with a no-pinch construction. The outer surface is completely encapsulated in plastic, offering a no-fail covering. Safe for cleanroom use. Wristband meets EN-61340-5-1 Personnel Grounding Requirements tested per ANSI/ESD S1.1

PRODUCT SPECIFICATIONS:

- Comfortable, long wearing, superior contact metal band
- Adjustable to fit most people
- 10mm snap stud
- Wristband is adjustable by adding or removing snap links
- Adjusts from 155mm to 280mm
- Designed for use with a cord having a 10mm socket and a 1 megohm current limiting resistor (not included)
- No logo
- Made in the Philippines

"Wrist straps should be tested periodically. The frequency of testing, however, is driven by the amount of usage, wear and ESD risk exposure that can occur between tests. For, example, what is the quantity of product handled between test periods? Typical test programs recommend that wrist straps that are used daily should be tested daily. However, if the products that are being produced are of such value that a guarantee of a continuous, reliable ground is needed then continuous monitoring should be considered or even required." [CLC/TR 61340-5-2 User guide Wrist Strap clause 4.7.2.4.4 Test frequency]

Unless otherwise noted tolerances are +/- 10%
