C	16.5	16.5	16.2

## Specifications

- Modular gender changers/adapters allow custom wiring of D to D adapters
- Each style available in male to male, female to female and male to female
- Each kit is provided with crimp terminated 75mm long link wires, which are easily pushed into the D connector male or female receptacle housings
- 9 way gender changing kits have 9 wires male to male or female to female with an extra 'Y' splitter wire 1 male to 2 male or 1 female to 2 female
- 9 way through adapters have 9 wires male to female with two 'Y' splitter wires one 1 male to 2 female and one 1 female to 2 male
- All other sizes have the correct number of re-terminated wires to suit the number of positions in the D connector plus the 'Y' splitters as above
