

POD S desktop units – Power and Data

Model shown POD 2 sockets

- Tough aluminium body
- Master switch as standard
- Cat 6 jack to jack
- Earthing point
- Individually fused to BS6396
- Flat base for table mounting
- Adhesive pad option
- Short lead to Wieland* connector

Sometimes a more cost effective or rugged solution is required, the POD S has individually fused UK power to BS6396 with a short lead to male Wieland* equivalent connector allowing multi length power cords. All POD's include a master switch.

Cat 6 couplers are used to link a front shuttered black RJ45 socket to a RJ45 socket at the back, Cat 6 patch cords are plugged in from the rear of the POD S to the data outlet.

A pair of desktop 'G' clamp allow mounting at the desk's edge or an optional pair of adhesive pads allows mounting anywhere on top of the desktop.

Power and Data units

839-9796 4 x individually fused power, 2 x Cat 6 coupler, master switch
