ENGLISH

RS Pro 12 A Soft Starter, 5.5 kW, 380 → 460 V ac

Product Details:

Three Phase Module, DIN-Rail Mounting

Extremely compact soft-start modules for use with 3 phase AC induction motors, offering the user excellent soft-start performance.

- Starting torque and run-up voltage are adjustable over a wide range
- Reduction in starting current
- Soft stop facility
- May be used in conjunction with RS electronic injection brake modules
- LED indication for monitoring
- Two phase control for smoother operation

May be used in applications such as materials handling conveyors, packaging machinery which requires higher starting torque, with reduced starting current compared with that may be achieved using snatch free soft start modules.

Specifications:

Phase:	3
Supply Voltage:	380 → 460 V ac
Current Rating:	12 A
Voltage Rating:	460 V ac
Power Rating:	5.5 kW
