Cat 5 & Cat 6 Installers Kit

RS Stock number 556-364

Description:

The Optronics network installer kit is a must have for anyone who is terminating a copper network. It contains all the essential tools needed for copper installation and is suited to all levels of users; from an apprentice right up to an experienced engineer. The kit contains a range of high quality tooling products (contents listed in the 'Specification' section) giving the user comfort in the knowledge that they are using superior tools with a consistent level of quality and performance.

The tools are packed into their own cut-foam compartments and are presented in a robust, virtually indestructible, yet stylish case. The cases are IP67 rated and are usually used in military applications, therefore, you can be assured that they have been through and passed rigorous testing. The inserts are made from a dense foam which is ideal for protecting any fragile equipment contained in the kit. Routed using a computerised method, the tools fit perfectly in their designated areas with the two-tone effect allowing for easy identification of any missing tools. In addition to the standard kit, we also offer a customisation programme for those who wish to put their own mark on the product and decide exactly how the contents should be made up.

Specifications:

ITEM	QUANTITY	ITEM	QUANTITY
Network Cable Tester	1	Label Markers + Dispenser	1
Precision Wire Cutters	1	Cable ties	100
Wire Cutter and Stripper	1	Modular Crimp Tool	1
Cable Cutter	1	Non Impact Punch down Tool with Krone Blade	1
UTP Stripper	1	Alternative Punch Down Blade for 66, 110/88	1
5m Tape Measure	1	Cat5e RJ45 Plugs	50
Cross Head Screwdriver	1	Junior Hack Saw	1
Flat Head Screwdriver	1		

Features:

- Airtight
- Crush proof
- Shock proof
- Interstackable
- Corrosion proof
- Sand and dust proof
- High thickness body material
- Watertight and Waterproof
- Can withstand temperatures between -33 & +90°C
