

1-Channel circuit breaker **EB-0824-100-0**

Picture shows EB 1824-XX0-0

Advantages

Automatic feedthrough of all signal levels
Optional bus connection via communication module
Optional undervoltage shutdown in combined network
Optional settings for tripping current
Additional load outputs through output distribution modules mountable side by side
Selective load-dependent activation
Versions with collective reset input

Applications

EB-27 Electronic circuit breaker with thermomagnetic characteristic with alarm signal forwarded for tripped and switched off channels to the connected channels. Starter version with fuse for 24 V loads.

EB-28 Electronic circuit breaker with current-limiting characteristic with alarm signal forwarded for tripped and switched off channels to the connected channels. Starter version with fuse for 24 V loads if active current limitation is required.

EB-08, EB-18, EB-38 Electronic circuit breaker with current-limiting characteristic and comprehensive communication with the connected modules. Suitable as advanced fuse for 24 V loads with option of reading more detailed current supply parameters and actively controlling the channels.
