Compact air cylinder ADN-2"-2 1/2"-A-P-A Part number: 557126

Data sheet

ston diameter2"ston rod thread1/2-ased on normISOushioningElastounting positionAnyode of operationDoulston rod endExteructural designPistoposition sensingFor pariantsPistopoerating pressure0.1 fpoerating mediumComformation on operating and pilot mediaOpeporrosion resistance class (CRC)2 - NNBS (PWIS) conformityVDMnbient temperature-20 G	uble-acting ernal thread con con rod file barrel proximity sensor con rod at one end
ston rod thread1/2-ased on normISOushioningElastounting positionAnyode of operationDoulston rod endExteructural designPistoposition sensingFor puriantsPistopoerating pressure0.1 fpoerating mediumComformation on operating and pilot mediaOpeportosion resistance class (CRC)2 - NNBS (PWIS) conformityVDNnbient temperature-20 0	21287 stic cushioning rings/pads at both ends uble-acting ernal thread con con rod file barrel proximity sensor con rod at one end
ased on norm ISO ushioning ISO ushioning Elast ounting position Any ode of operation Doul ston rod end Exte ructural design Pisto Pisto position sensing For p uriants Pisto perating pressure 0.1 <i>I</i> perating pressure 1 ba perating medium Com formation on operating and pilot media Ope prosion resistance class (CRC) 2 - <i>N</i> NBS (PWIS) conformity VDM nbient temperature -20 C	21287 stic cushioning rings/pads at both ends uble-acting ernal thread con con rod file barrel proximity sensor con rod at one end
IshioningElastounting positionAnyode of operationDoulston rod endExteructural designPisteposition sensingFor pariantsPisteoperating pressure0.1 foperating pressure1 baoperating mediumComformation on operating and pilot mediaOpeorrosion resistance class (CRC)2 - NNBS (PWIS) conformityVDNnbient temperature-20 C	stic cushioning rings/pads at both ends uble-acting ernal thread con con rod file barrel proximity sensor con rod at one end
ounting positionAnyode of operationDoulston rod endExteructural designPisteposition sensingFor puriantsPisteoperating pressure0.1 moperating pressure1 baoperating mediumComformation on operating and pilot mediaOpeorrosion resistance class (CRC)2 - NNBS (PWIS) conformityVDNnbient temperature-20 °	uble-acting ernal thread con con rod file barrel proximity sensor con rod at one end
ode of operationDoulston rod endExteructural designPistoposition sensingFor ppariantsPistooperating pressure0.1 <i>I</i> operating pressure1 baoperating mediumComformation on operating and pilot mediaOperoprosion resistance class (CRC)2 - NNBS (PWIS) conformityVDNnbient temperature-20 0	uble-acting ernal thread con con rod file barrel proximity sensor con rod at one end
ston rod endExterructural designPistoposition sensingFor profitariantsPistoperating pressure0.1 fpoerating pressure1 bapoerating mediumComformation on operating and pilot mediaOpeporrosion resistance class (CRC)2 - NNBS (PWIS) conformityVDNnbient temperature-20 C	ernal thread con con rod file barrel proximity sensor con rod at one end
ructural design Pisto Profit position sensing For p minants Pisto perating pressure 0.1 M perating pressure 11 ba perating medium Com formation on operating and pilot media Ope prosion resistance class (CRC) 2 - M NBS (PWIS) conformity VDM mbient temperature -20 G	con con rod file barrel proximity sensor con rod at one end
Pisto Profiposition sensingFor profipariantsPistopoerating pressure0.1 hpoerating pressure1 bapoerating pressure14.5poerating mediumComformation on operating and pilot mediaOperporrosion resistance class (CRC)2 - NABS (PWIS) conformityVDNnbient temperature-20 °	on rod file barrel proximity sensor on rod at one end
viriants Pisto perating pressure 0.1 f perating pressure 1 ba perating pressure 14.5 perating medium Com formation on operating and pilot media Operation person resistance class (CRC) 2 - N ABS (PWIS) conformity VDN nbient temperature -20 °	on rod at one end
perating pressure 0.1 f perating pressure 1 ba perating pressure 14.5 perating medium Com formation on operating and pilot media Oper perosion resistance class (CRC) 2 - N NBS (PWIS) conformity VDN nbient temperature -20 °	
perating pressure1 baperating pressure14.5perating mediumComformation on operating and pilot mediaOperperosion resistance class (CRC)2 - NABS (PWIS) conformityVDNnbient temperature-20 °	
perating pressure14.5perating mediumComformation on operating and pilot mediaOperprrosion resistance class (CRC)2 - NABS (PWIS) conformityVDNnbient temperature-20 G	MPa 1 MPa
operating medium Com formation on operating and pilot media Oper porrosion resistance class (CRC) 2 - N ABS (PWIS) conformity VDN nbient temperature -20 °	ar 10 bar
formation on operating and pilot media Oper prosion resistance class (CRC) 2 - N ABS (PWIS) conformity VDN nbient temperature -20 C	5 psi 145 psi
orrosion resistance class (CRC) 2 - N ABS (PWIS) conformity VDN nbient temperature -20 °	npressed air as per ISO 8573-1:2010 [7:4:4]
ABS (PWIS) conformity VDN nbient temperature -20 °	eration with oil lubrication possible (required for further use)
nbient temperature -20 °	Noderate corrosion stress
-	MA24364-B1/B2-L
pact energy in the end positions 1.00	°C 80 °C
	0059 J
neoretical force at 6 bar, retracting 1057	7 N
neoretical force at 6 bar, advancing 1178	78.001 N
oving mass at 0 mm stroke 140.	0.503 g
ditional moving mass per 10 mm stroke 51.1	172 g
asic weight with 0 mm stroke 541.	.939 g
ditional weight per 10 mm stroke 16.0	046 g
With With	ionally: h through-hole h internal thread h accessories
neumatic connection 1/8	NPT
ange screws material Stee	el
over material Wrot	ought aluminum alloy, anodized
aterial of dynamic seals TPE-	-U(PU)
ston rod material High	h-alloy steel

FESTO

Feature	Value
Material of cylinder barrel	Wrought aluminum alloy, smooth-anodized
