

## 24 10/100/1000Mbps Port Gigabit L2 Web-Smart Managed PoE+ Switch, 300W, 2 Dedicated Gigabit SFP Slots, 52 Gbps, Web Interface

MODEL NUMBER: NGS24C2POE

Fully managed 24-port web-smart Gigabit 300W PoE+ network switch with dual SFP slots in a 1U rack-mount/desktop unit. Ideal for monitoring and controlling a LAN in a small-to-medium distributed network.

### Description

The energy-efficient NGS24C2POE 24-Port Gigabit L2 Web-Smart Managed PoE+ Network Switch features 24 twisted-pair RJ45 Gigabit Ethernet ports that support auto-negotiable 10/100/1000 Mbps and auto MDI/MDIX cross-over detection functions for convenient plug-and-play capability. Each port can be configured to supply up to 30W of PoE+ (Power over Ethernet) via network cable to connected high-wattage devices, such as VoIP phones, wireless access points and security cameras. Two dedicated mini-GBIC SFP ports are also included for uplinking data to other switches via optical fiber or copper.

Easy-to-read LEDs indicate connection and activity status for each port. Built-in web-smart management software gives you remote access to monitor and control each connected device via secure web-based interface. Each port supports up to 2 Gbps with full duplex.

The heavy-duty metal housing mounts into 1U of an EIA-standard 19-inch rack using the included brackets and user-supplied hardware. Or attach the included rubber feet to the bottom of the unit for installation on a flat desktop surface. The five-foot input cord with NEMA 5-15P plug connects to a protected UPS, generator or mains input AC source.
