L-Keys for Hexagon Socket Screws

EAN: 4013288041210 **Size**: 91x15x2 mm

Part number:05022081001Weight:2 gArticle number:950 PKL inchCountry of origin:CZ

Customs tariff 82054000 number:

- L-keys for hexagonal socket screws
- · Hex-Plus allows socket head screws to live longer
- · Hexagonal ballpoint on the long arm
- BlackLaser for high corrosion protection and long service life
- Metric

High quality L-keys for imperial hexagonal socket screws. The ball-end on the long arm allows for reliable working even in difficult installation situations. The BlackLaser surface treatment provides outstanding surface protection, even against corrosion, and a long service life. The tools are quickly to hand thanks to the laser-engraved and thereby wear-resistant size markings on the L-keys.

L-Keys for Hexagon Socket Screws

We questioned the classic L-key

design, since all too often the

screw head recess is rounded out,

meaning screws can no longer be

tightened or loosened - and so the

user finds the L-key slipping out of

the recess. Wera Hex-Plus tools

have a larger contact surface in the screw head. The notching

effects are reduced and thereby

the deformation of the screws. At

the same time, as much as 20 %

more torque can be applied.

L-Keys

Hex-Plus

Hexagon screws can endure a problem because the contact surfaces delivering the power from the conventional tool, is transferred to the screw via very small surface areas. The consequence: the screw can become damaged (rounding out). Hex-Plus tools have a greater contact surface that prevents this from happening! At the same time, as much as 20 % more torque can be applied. Good to know: Hex-Plus tools fit into every standard hexagon socket screw!

Ball tip

The spherical drive profile means that it is possible to swivel the axis of the tool to that of the screw, and therefore enable angled, "around-the-corner" screwdriving jobs.

Surface protection

Chrome-plated hexagon L-keys for outstanding surface protection and long service life. High corrosion protection.

Size identification

The size of each L-keys has been engraved by a laser. In addition SPKL L-keys have a colour coding according to sizes – for simple and rapid accessing of the required tool. Making it easy to find the right tool.
