

SKU: HSE221E

9.0mm (0.35in) Black on White 3:1 Heat Shrink Tube

Ideally suited to mark cables, fiber cables, and wires, this 9.0mm (0.35in) black print on white shrink wrap label tubing is recommended for diameters ranging from 1.6mm to 5.4mm (0.052in to 0.21in). With a 3:1 shrink ratio, this tubing can shrink to a third of its size when heat is applied, enabling it to pass over connectors and still shrink down to a snug fit on the cable. Meets UL 224 standard and can withstand up to 600 volts and 257° F (125° C).

1.5m (4.9ft) of tube per cassette. 1 cassette per package. For use with P-touch 300 Series, 500 Series, 800 Series, and 900 Series label printers.
